

COLLECTIONS 2015/2016

OUR TECHNOLOGIES

WASHLET technologies

-  **Warm water nozzle**
An individually adjustable wand system with self-cleaning function
-  **Heated seat**
Individually adjustable temperature
-  **Deodoriser**
Filter system to absorb odours
-  **Dryer**
Warm jet of air
-  **PreMist**
Mist of water sprayed onto the ceramic before the toilet is used. Makes it more difficult for dirt and waste to accumulate
-  **Auto Functions**
Sensor-based technologies
-  **ewater+**
Electrolysed antibacterial water that eliminates bacteria
-  **Actilight**
Zirconium coating combined with UV light for an antibacterial effect that breaks down waste
-  **Water-saving**
Technologies that save water

Shower technologies

-  **Aerial Shower**
Aerated water for the shower
-  **Aerial Pulse**
Aerated water with a pulsating function
-  **Water Pillar**
A gentle, voluminous stream of water that envelopes the entire body
-  **Cascade Flow**
Waterfall-like shower function that warms the entire body
-  **Gyrostream**
Shower jets with rotating and pulsating functions
-  **Water-saving**
Technologies that save water

Toilet technologies

-  **Tornado Flush**
Highly effective two- or three-jet flush
-  **Rimless design**
Ceramic toilet bowl without hard-to-reach areas along the top edge
-  **CeFiONtect**
Special hygienic glaze for a smooth ceramic surface
-  **Water-saving**
Technologies that save water
-  **4.5 l flush**
Water-saving full flush uses just 4.5 l

Faucet technologies

-  **Auto Functions**
Sensor-based technologies
-  **SMA**
Maintains a constant water temperature despite fluctuating water supply temperatures and pressure levels
-  **SelfPower**
Sensor-activated faucet generates its own electricity
-  **EcoCap**
Fuller aerated water stream
-  **Water-saving**
Technologies that save water

Washbasin technologies

-  **CeFiONtect**
Special hygienic glaze for a smooth ceramic surface
-  **LUMINIST**
Translucent epoxy resin material

COLLECTIONS

2015/2016

ENJOY JAPANESE
BATH CULTURE.
ENJOY TOTO.

TECHNOLOGY

Japanese technologies are synonymous with innovation around the world. TOTO uses technologies in line with the state-of-the-art requirements of today's bathroom: offering above-average hygiene, maximum comfort – for people of all ages – while conserving resources. This leads to product innovations unlike any available on the European market before.

WELL-BEING

Since time immemorial, Japanese bathroom culture has represented the epitome of cleanliness and well-being. Above all else, every TOTO bathroom provides not only convenience and functionality, but also a haven for relaxation. It is for this reason that TOTO brings together Asian bathroom culture with Western engineering.

COMFORT

It is impossible to imagine the bathroom of the future without outstanding comfort. TOTO is working to further enhance the factor of comfort at every level. This includes self-cleaning WASHLETs that offer the greatest possible hygiene. TOTO also develops shower technologies that offer luxurious experiences while using little water.

DESIGN

Japanese design represents quintessential clarity, functionality and minimalism. Its crisp oriental contours are a hallmark of TOTO's signature design style. The result: High-quality technology that you can feel – but you can't see.

PURITY

The bathing ceremony has always been an element of Japanese culture. Cleanliness and hygiene are an integral part of everyday life in Japan, where spiritual and physical purity go hand-in-hand. One cannot exist without the other. This is also one of TOTO's main principles.

OUR PRINCIPLE

DISCOVER THE BATHROOM OF TOMORROW

The bathroom of tomorrow is a haven that seamlessly combines technology, comfort and design. As consumer demands increase, so does our expertise – and with it the satisfaction of our customers.

DESIGNED WITH THE USER IN MIND

Technology is something that should be felt rather than seen, while design simplifies the use of that technology. TOTO represents the ideal symbiosis of technology and design, complex construction and simple operation.

HYGIENE

Cleanliness, and thus hygiene, play a key role in the bathroom of the future. For TOTO, superior hygiene is not only achieved through cleaning, but is also the result of numerous design, material and technological innovations – innovations and materials that prevent dirt from sticking to surfaces, and technologies that allow it to be removed with only the minimal use of bathroom cleaner.

SUSTAINABILITY

The bathroom is a haven of well-being and relaxation, neither of which should be achieved at the expense of the environment. That's why TOTO considers the development of energy- and water-saving technologies essential in creating the bathroom of tomorrow.

For this reason, our ethos is:

CLEAN TECHNOLOGY SINCE 1917

CLEAN & GREEN

At TOTO, the main focus of innovation is to develop technologies that conserve resources. Of the company's 24,000 employees, a dedicated team of 900 in Research and Development alone works to make the products more sustainable.

Sustainability in the bathroom primarily means saving water. TOTO also develops materials and technologies that minimise the use of aggressive

cleaning products or generate their own energy, thus conserving resources over the long-term.

Naturally, the bathroom only takes up a small part of an entire building. This is why TOTO has developed technologies to support the "green building" beyond this one room. HYDROTECT, for example, is a surface coating for exterior facades that is self-cleaning, antibacterial and even cleans the air.

HYDROTECT-coated surfaces (facades, windows or tiles) clean themselves and the air around them. When used indoors, they are also antibacterial.

Water is aerated for a fuller, more comfortable flow of water – an enhanced shower experience that uses less water.

Automatic faucets save water and electricity.

At TOTO, sustainability means conserving resources where possible and practical while enhancing the comfort and quality of the products. In the end, this is what creates true sustainability at every level.

We have toilets that offer the option to use a 3 and 4.5l flush. All of our toilets also come equipped with the highly effective two or three-jet Tornado Flush. The rimless design and CeFiONtect glaze allow for easier, more thorough cleaning without any aggressive cleansers. The new generation WASHLETs, featuring the ewater+ and Actilight technologies, even go one step further: They include anti-bacterial and self-cleaning properties. The PreMist function available on our WASHLETs sprays the toilet bowl with water before use, making it more difficult for dirt and waste to accumulate.

Ceramics featuring the CeFiONtect glaze prevent dirt and bacteria from accumulating. They also require less water and cleaning products to keep clean.

10 GOOD REASONS TO CHOOSE TOTO

- 1. DESIGN AND TECHNOLOGY CAN GO HAND-IN-HAND IN THE BATHROOM.**
- 2. OUR PRODUCTS REPRESENT THE BEST OF JAPANESE AND EUROPEAN CULTURE.**
- 3. NEARLY 24,000 EMPLOYEES AROUND THE WORLD ENSURE THAT IT STAYS THAT WAY.**
- 4. TOTO'S PRODUCTS ARE BASED ON OVER 100 YEARS OF EXPERIENCE.**
- 5. TOTO HAS PRODUCED WASHLETS FOR 35 YEARS AND IS THE WORLD'S MARKET LEADER.**

- 6. TOTO INVENTED THE FIRST WASHLET WC THAT CLEANS ITSELF COMPLETELY.**
- 7. SAVING WATER AND ENJOYING A RELAXING SHOWER CAN GO HAND-IN-HAND.**
- 8. TOTO MAKES IT POSSIBLE TO CONSERVE RESOURCES WHILE CUTTING COSTS.**
- 9. A JAPANESE MARKET LEADER KEEPS ITS PROMISES.**
- 10. WE ARE INTERESTED IN HYGIENE – NOT JUST CLEANLINESS.**

NEOREST

Wellness for the home: The NEOREST collection unites technological innovations with the clear, streamlined TOTO design. After all, you shouldn't see the technology in the bathroom of tomorrow. You should just experience it.

NEOREST WASHBASIN

The NEOREST washbasins have a streamlined design. The surface has a homogeneous look thanks to the hidden drain. The special CeFiONtect glaze makes it difficult for dirt and bacteria to accumulate. The overflow features an elegant chrome-colour cover.

► Detailed information, p. 30

WASHLET NEOREST AC AND EW

The NEOREST AC WASHLET is the first completely self-cleaning WASHLET. In addition to keeping bacteria, dirt and lime scale from accumulating, it actively fights against it.

The NEOREST WASHLET is available in two versions: the NEOREST AC (Actilight) and NEOREST EW (ewater+). They look the same, but work in different ways. The NEOREST AC is self-cleaning, and actively combats dirt and bacteria.

The NEOREST EW WASHLET sprays the inside of the toilet bowl with electrolysed water. This antibacterial water

keeps dirt and lime scale from building up. The NEOREST AC WASHLET comes equipped with a toilet bowl featuring a special zirconium coating. The hydrophilic properties of this coating ensure that dirt and bacteria are completely washed away. The integrated UV light works in tandem with the zirconium coating to trigger a decomposition process. This breaks down any dirt and waste and making the toilet brush unnecessary.

The toilet cleans itself, and stays fresh and hygienic.

The NEOREST WASHLETs also have other comfort features, like the sensor-based lid that automatically lifts and lowers, a heated seat, a filter system that effectively absorbs unpleasant odours, and a dryer that can be activated if desired.

Both WASHLETs also have the PreMist function. This sprays the toilet bowl with water before use, making it more difficult for dirt and waste to accumulate.

All of this technology is still easy to use thanks to the user-friendly, convenient remote control.

SHOWER

The flexible shower system transforms your everyday shower into a luxurious wellness experience.

The large shower head integrated into the ceiling offers three different types of jets. The special highlight is a thick, heavy stream of water called the Water Pillar, which surrounds and warms the body like a second layer of skin without splashing.

Our proven Air-in technology aerates the water in the shower head and hand-held sprays, making it possible to enjoy a luxurious shower experience while using less water.

This shower system also features the Gyrostream massage shower feature. The rotating jets embedded in the wall create a pulsating stream of water that rinses and warms the entire body.

The hand shower also offers three different types of sprays that can be selected using a dial. In addition to the massage function (Gyrostream) and aerated water (Aerial Shower), the hand shower includes the Cascade Flow feature, which turns the water into a little waterfall.

NEOREST BATHTUB

The NEOREST bathtub celebrates Japanese bathing culture. The freestanding bathtub underscores the streamlined design of the collection while representing outstanding comfort in the bath.

The material used for the bathtub is both extremely durable and extraordinarily hard.

The two armrests are optional, and a removable pillow also provides additional comfort. These options turn the bath into a wonderful wellness experience.

WASHBASIN

The SG washbasins feature a streamlined design and exquisite, yet simple details. The covered drain creates a homogeneous surface that emphasises the clear, almost seamless design of this collection. The washbasin is available in two different sizes, 600 mm and 900 mm. The CeFiONtect glaze also keeps dirt and waste from accumulating on these washbasins as well. The SG collection furnishings further enhance this understated elegance.

FURNITURE

The SG furniture collection underscores the clean lines of the washbasin. These practically seamless objects create a consistent overall look with the rest of the collection. The stainless steel details provide timeless, modern accents that can be combined with warm wooden surfaces.

The push-to-open and soft-close mechanisms ensure that the design and functionality of these pieces meet the demands of today's consumers. Featuring two outlets and a practical drawer divider, the counter cabinets provide all of the necessities of a modern bathroom.

As a special highlight, each drawer in this collection is equipped with an LED light.

AUTO FAUCETS

WASHLET

The SG WASHLET offers all the standard features available in all other TOTO WASHLETs. In addition to the characteristic warm water spray, the WASHLET has a heated seat, an odour-absorbing deodoriser, dryer, and the PreMist function, which sprays the toilet bowl with a fine mist of water. This makes it more difficult for dirt to accumulate. The ewater+ function sprays the toilet bowl with electrolysed water after use. Electrolysed water is antibacterial and cleansing, is absolutely environmentally friendly and can be returned back to the water cycle.

► Detailed information, p. 48

TOILET

Like all TOTO toilets, the SG collection toilet provides the ideal combination of the highest standards of hygiene and outstanding product quality. The proven CeFiONtect glaze makes it practically impossible for waste and bacteria to accumulate. The rimless design and Tornado Flush ensure a completely clean toilet bowl with no hidden areas for build-up. The toilet also features a soft-closing lid.

► Detailed information, p. 48

SHOWER SYSTEM

The TOTO Shower System can also be combined with the SG collection.

The SG shower offers a number of different functionalities depending on people's needs.

The ceiling-mounted overhead shower offers the water-saving Aerial Pulse technology, which gently pulses and propels the water to transform the shower into a comfortable experience. The Gyrostream massage feature and voluminous Water Pillar stream are functions that turn the shower into a wellness experience.

The hand shower also offers a variety of functions that can be easily activated using the dial. In addition to the water-saving Aerial Shower, the user can switch to the massaging Gyrostream and waterfall-like Cascade Flow settings.

WASHBASIN SUBCABINET

The SG washbasin subcabinet has an impressive, practically seamless look. It looks smooth and elegant on the outside, and has plenty of space on the inside. Thanks to its push-to-close and soft-close mechanisms and integrated outlets, it can hold just about anything that needs to be stored in the bathroom. Purists can order the cabinet in white, and people looking for a warmer look can choose the teak veneer.

MH MODULAR HOME FOR PEOPLE WHO LIKE TO MAKE THEIR OWN DECISIONS.

Whether design, comfort, hygiene, or sustainability, TOTO technologies are always at the cutting edge. In our MH collection you will find the following TOTO technologies:

► For technologies, please see page 187 onwards

MH

Our collection, MODULAR HOME, features an extensive range of design options to reflect a cosmopolitan lifestyle. All the elements can be mixed and matched to meet your requirements and expertly combine functionality with a clear visual style.

AS FLEXIBLE AS LIFE ITSELF, BUT MORE PREDICTABLE

Creativity requires space to spread its wings, which is why MH provides the flexibility essential in the cosmopolitan bathrooms of today. To ensure your bathroom meets your needs, all the collection's elements are modular in design, giving you the creative scope to design a bathroom that lives up to your expectations. After all, modern life is all about being free to make your own decisions.

This collection offers the ultimate in flexibility in terms of installation and combination options. Shortened drawers provide space for plumbing fixtures behind the furniture.

MODULAR FURNITURE

Because we know that no two people have exactly the same expectations of a bathroom, we've come up with furniture that's modular in its design. The individual elements can be mixed and matched in a whole host of ways to create a bathroom to meet any expectations. The MH collection is available with a choice of three different surfaces and offers endless scope for creating your perfect bathroom.

There are two types of cabinets: One features a glass shelf and a door. The other is an open, wallhung module available with or without box inserts.

► Detailed information, p.88

BASIN

This basin boasts clear, understated design. Thanks to its special CeFiONtect glaze, dirt is much less likely to stick to the surface. Equipped with EcoCap technology, the faucet offers an agreeably powerful water jet despite its water-saving design.

► Detailed information, p. 88

COUNTERTOP CONSOLE

Available in various widths, the counter console has the right solution for any application. All MH furniture drawers feature a push-to-open mechanism, making them simple to open and close. A soft lining makes them easier to clean and provides added grip for the toilet-ries inside.

► Detailed information, p. 88

ROLLING CONTAINER

The rolling container is yet another element in the modular MH collection and features drawers for additional storage space.

► Detailed information, p. 88

ACCESSORIES

The accessories and faucets in this collection reflect the aesthetic style of the ceramics. As such, the same striking attributes can be seen consistently throughout the MH series.

► Detailed information, p. 88

MH WASHBASIN

People who prefer round shapes can combine the furnishings with this MH washbasin. Its curved, sweeping design is an interesting contrast to the streamlined, simple furniture in this collection.

► Detailed information, p.88

TOILET/GL WASHLET 2.0

Our MH toilet is all about design flexibility. Whether you opt for a wall-mounted, freestanding or pedestal design, it can be transformed into a WASHLET[®] at any time.

All toilets feature our powerful, effective Tornado Flush, the extremely smooth, durable CeFiONtect glaze, and a rimless bowl.

The WASHLET GL 2.0 features the proven standard WASHLET technologies, including the adjustable warm water spray, heated seat and PreMist function to make it more difficult for dirt and waste to accumulate. All functions can be operated using the convenient remote control.

MH WC/WASHLET EK 2.0

The WASHLET EK 2.0 can also be combined with MH collection toilets.

They share the same important functions as the WASHLET GL 2.0. In this version, however, people use the control panel on the side to activate the individual functions.

► Detailed information, p. 88

BIDET

The MH bidet provides all that is essential in today's cosmopolitan bathrooms. Whether free-standing or wall-mounted, it can be combined with all other elements of the MH collection in order to meet your individual requirements.

WALL FAUCETS

WARM AND RICH IN CONTRASTS

With white, high-gloss surfaces and dark teak elements, the MH collection offers a high-contrast solution that brings a warm atmosphere to your bathroom. The dark surface in particular emphasises the clear white contours of the ceramics.

AUTO FAUCETS

COUNTERTOP CONSOLE/VANITY UNIT

The dark surfaces of the console emphasise the white ceramics of the washbasin. The U-bend is cleverly concealed using wooden panels.

The vanity unit features a push-to-open mechanism, which allows it to be opened with a gentle touch. The surface is water-resistant and is, therefore, ideal for use in the bathroom.

► Detailed information, p. 88

SIDE BOARD/ROLLING CONTAINER

The wall cabinet offers plenty of storage space. The optional shelf elements offer an attractive contrast to the smooth white surfaces and can also be used for ornaments.

The rolling container with its concealed drawer not only offers a place to sit, but also additional space for storage.

► Detailed information, p. 88

SHOWER

The hand shower has three different types of sprays to create a comfortable, luxurious shower experience which reduces water consumption.

TIMELESS DESIGN AS A CONCEPT

White is classic and timeless, and fits in with any lifestyle. The same can be said for the MH collection white series, which can be combined with the collection's other surfaces, offering unparalleled scope for creativity and thus flexibility.

► Detailed information, p. 88

WASHBASIN

Our washbasins come in different styles, including vessel basins, washbasin and furniture sets, pedestal basins, and half-pedestal basins. MH has just the right solution for any requirements and any shape of bathroom.

WASHLET GL 2.0 AND EK 2.0

The WASHLET GL 2.0 features the proven standard WASHLET technologies, including the adjustable warm water spray, heated seat and PreMist function to make it more difficult for dirt and waste to accumulate. All functions can be operated using the convenient remote control.

The WASHLET EK 2.0 and WASHLET GL 2.0 share the same essential functions. The WASHLET GL has a control panel on the side to activate the individual functions.

► Detailed information, p. 88

TOILET/BIDET

The understated, subtle design of our toilets and bidets is sure to fit in with any bathroom and combines seamlessly with the colours of the MH collection. As always, the ceramics feature TOTO's CeFiONtect glaze.

Like any other TOTO toilet, this one can be transformed into a WASHLET, should the need ever arise.

MIRROR

Even the MH mirror with its strip light is modular in its design, as it can be mounted either vertically or horizontally. A range of mounting options offers maximum scope for creativity.

► Detailed information, p. 88

VANITY UNIT

The vanity unit drawer features clever dividers and a push-to-open mechanism which makes it simple to open. Optional, height-adjustable feet are available for all the furniture and ensure increased stability and safety.

► Detailed information, p. 88

MH GUEST BATHROOM

The MH collection provides just the right solution for smaller spaces, so guests can also enjoy all the benefits of TOTO in the guest bathroom.

GUEST BATHROOM FIXTURES

The MH collection also offers solutions for smaller guest bathrooms that are just as versatile as those for larger ones.

COUNTER CABINET / WASHBASIN

The organic curves of the washbasin are reminiscent of the surface tension of water. The special CeFiONtect glaze is highly functional and makes the ceramics easier to clean. The harmoniously shaped counter cabinet not only supports the washbasin, but also contains two drawers that open with a push-to-open mechanism.

► Detailed information, p. 118

WALL CABINET

The wall cabinet continues the organic rounded corners found in the NC collection, which makes this the ideal complement to the washbasin and counter cabinet. It offers convenient and ample storage with its understated design.

► Detailed information, p. 118

ACCESSORIES

The drawers feature dividers made of solid oak and a push-to-open mechanism that makes them easier to open. Matching accessories in the same visual style as the furniture and ceramics round off the collection to perfection.

► Detailed information, p. 118

WASHLET GL 2.0/WC

The WASHLET GL 2.0 offers modern technology in terms of bathroom hygiene and comfort. The adjustable wand jet system makes it possible to change the position, pressure and temperature of the water spray. The WASHLET also has a heated seat.

The WASHLET also comes equipped with the PreMist function, which sprays the toilet bowl with water before use, making it more difficult for dirt and waste to accumulate.

HALF-PEDESTAL AND PEDESTAL WASHBASINS

The versatile NC washbasins are available in pedestal and half-pedestal designs, enabling you to create the perfect design for your bathroom. All NC washbasins feature our special CeFiONtect glaze, so dirt is much less likely to stick to the surface.

► Detailed information, p. 118

WALL CABINET / WASHBASIN SUBCABINET

The subcabinet's water-resistant walnut veneer provides a pleasant contrast to the white NC washbasins. A push-to-open mechanism makes it easy to open the two drawers. With its rounded corners, the wall cabinet complements the NC counter cabinet. The mirror design draws on the shapes of the NC collection and, with the illuminated surround, forms the ideal contrast to the dark, warm tones of the walnut veneer.

TOILET/BIDET

With its organic form, the NC toilet fits in perfectly with the classic aesthetics of the NC collection. Featuring TOTO's signature combination of functionality and exceptional design, the toilet provides a superior level of hygiene: Our innovative Tornado Flush and special CeFiONtect glaze ensure cleanliness. The rimless design of the bowl allows it to be thoroughly cleaned with ease.

NC GUEST BATHROOM

The NC collection provides just the right solution for smaller spaces, so guests can enjoy all the benefits of TOTO in the guest bathroom.

COUNTER CABINET / HANDRINSE BASIN

The NC range also includes a small counter cabinet developed specially for guest bathrooms, with plenty of storage space for toiletries. The vessel handrinse basin can be positioned at any angle, allowing the faucet to be installed on either the left or the right. The same applies to the adjustable mirror, which can be mounted with the illuminated panel on the left or right-hand side.

TOILET/WASHLET

The NC collection focuses on straight lines and user-friendly functionality, avoiding decorative elements. The toilet can be equipped with a lid, WASHLET GL 2.0 or WASHLET EK 2.0.

The combination of rimless bowl design, three-jet Tornado Flush and CeFiONtect glaze improves overall hygiene.

CF CLEAN FUTURE FOR PEOPLE WHO EXPECT MORE FROM THE STANDARD.

Whether design, comfort, hygiene, or sustainability, TOTO technologies are always at the cutting edge. In our CF collection you will find the following TOTO technologies:

► For technologies, please see page 187 onwards

CF

The Clean Future collection offers a strong standard at the high level of quality synonymous with TOTO. The streamlined, understated design makes the bathroom collection ideal for every space. It can also be combined with a number of different TOTO products.

NEOREST

SG

MH

NC

CF

LUMINIST

WASHLET

SHOWERS

AUTO FAUCETS

SHOWER

The versatile shower system can also be combined with the CF series, shown here with an overhead wall-mounted shower. It enlarges the individual drops of water to create a very full stream without using any extra.

The hand shower also uses very little water.

► Detailed information, p. 132

WASHBASIN

The CF washbasins are characterised by their clean lines, streamlined design and straightforward functionality. Like all TOTO washbasins, they include the special CeFiONtect glaze, which makes it more difficult for dirt to accumulate. The simple design makes the CF washbasins very compatible with other TOTO products. The CF washbasins are available in two sizes: 650 and 850 mm.

TOILET

The CF toilet has an impressively understated design. It features the three technologies that make all TOTO toilets the most hygienic available on the market. The special CeFiONtect glaze keeps dirt from accumulating, the two-jet Tornado Flush ensures very thorough cleaning, and the rimless bowl design makes the toilet easy to clean. The CF toilet is suitable for every bathroom with a standard of maximum hygiene.

► Detailed information, p. 132

CF WASHLET

The CF WASHLET is the ideal starter model for anyone wishing to enjoy the advantages of a shower toilet in their bathroom. In addition to the tried-and-tested WASHLET technologies, it includes the warm water spray, heated seat, warm air dryer, deodoriser, memory function, automatic energy-saving mode and remote control.

This WASHLET has a PreMist function. This sprays the toilet bowl with water before use, making it more difficult for dirt and waste to accumulate.

LUMINIST

THE YIN AND YANG IN YOUR BATHROOM.

Whether design, comfort, hygiene, or sustainability, TOTO technologies are always at the cutting edge. In LUMINIST, TOTO has developed an exceptional material:

► For technologies, please see page 187 onwards

LUMINIST VESSEL BASIN

TOTO has created in LUMINIST an epoxy resin material that combines the visual appeal of frosted glass with extreme durability and heat resistance. It has a glass-like appearance, yet is warm and silky to the touch and appears to glow, thanks to the diffused light which shines through from beneath.

Whichever LUMINIST washbasin you choose, you can be sure it will become the highlight of your bathroom. As the water flows into the washbasin, the translucent material appears to dance.

The vessel basin is available in a choice of circular or rectangular designs and in the colour crystal snow.

LUNA VESSEL BASIN

Bring the glory of nature into your bathroom with the Luna washbasin. The effect of the basin's LED illumination is not unlike witnessing the corona in a solar eclipse, making it the central feature of any bathroom.

While draining away, the water seems to cascade unseen over the edge of an inlaid circular base, which is available in pure white or contrasting black.

BATHTUB

This bathtub enhances the combination of light and water for relaxing, beautiful effects. The bathtub's gentle shimmer, created using LEDs, underscores the clarity of the design and creates an ambience of well-being throughout the bathroom.

► Detailed information, p. 142

► Awards

WASHBASIN

The beautiful LUMINIST washbasin creates sensuality in the bathroom. It received the red dot design award for its outstanding design in 2009. The integrated LEDs installed beneath the innovative LUMINIST create a beautiful impression. The translucent material has a soft, velvety texture that is also highly durable.

THE BATHROOM OF THE FUTURE IS JAPANESE. COURTESY OF TOTO.

Comfort, convenience, technology, and sustainability don't necessarily have to be mutually exclusive. With TOTO WASHLETs, you can have them all. They offer everything you need to create the luxury bathroom of the future. TOTO, as inventor of the washlet, has been working for 30 years to optimise its technology, helping to bring hygiene, comfort, convenience, and sustainability to the bathroom. It's a mission to which over 36 million TOTO WASHLETs around the world bear witness – every single day.

Whether design, comfort, hygiene, or sustainability, TOTO technologies are always at the cutting edge. All our WASHLETs feature the following TOTO technologies:

► For technologies, please see page 187 onwards

WASHLET TECHNOLOGY

Every WASHLET is an embodiment of TOTO's core philosophy of perfectly combining design and function.

In order to ensure that they bring the very highest levels of comfort and convenience to the bathroom, TOTO WASHLETs feature a range of innovative technologies.

The core feature of every WASHLET is an innovative integrated wand which uses warm water to provide personal cleansing, providing hitherto unparalleled levels of hygiene. The temperature, position and pressure of the water jet can be individually customised according to your personal preferences and requirements. The wand then cleans itself after every use.

But TOTO WASHLETs have even more features. Depending on the model, the seat can be heated to keep it warm and comfy, sensors can relieve you of the need to use your hands for things such as opening and closing the lid, a deodoriser can absorb unpleasant odours, and a dryer function can greatly reduce the need for toilet paper.

The latest generation of WASHLETs is self-cleaning, and actively fights waste and bacteria.

Nearly all TOTO WASHLETs include the PreMist function. This sprays the toilet bowl with water before use, making it more difficult for dirt and waste to accumulate.

► Detailed information, p. 164

**TOILET BOWL SPRAYED WITH EWATER+**

NEXT GENERATION WASHLETS

The new Actilight (NEOREST AC) and ewater+ (NEOREST EW) WASHLET technologies are setting new standards in hygiene.

The new ewater+ technology supports the active decomposition of bacteria on the ceramic surface.

The WASHLET sprays the toilet bowl with electrolysed water. This anti-bacterial water prevents waste from accumulating.

This technology is now available in all NEOREST and SG WASHLETs.

People with higher standards can take one step further with the NEOREST AC. It looks the same, but the ceramic bowl features the proven zirconium coating with its outstanding hydrophilic properties. It combines with the water film to easily wash the waste away. The UV light integrated in the lid is activated once the lid is closed.

Combined with the special zirconium coating, the light triggers a decomposition process to eliminate the waste and bacteria. The result is a hygienic and clean toilet that no longer requires a toilet brush.

► Detailed information, p. 164

WASHLET GL 2.0

GIOVANNONI WASHLET

WASHLET EK 2.0

WASHLET NEOREST

The NEOREST AC WASHLET is the first self-cleaning WASHLET. In addition to the proven WASHLET technologies, the NEOREST WASHLET actively fights the formation of dirt and bacteria.

The NEOREST WASHLET is available in two versions: the NEOREST AC (Actilight) and NEOREST EW (ewater+). They look the same, but work in different ways. Actilight technology uses a UV light and zirconium-coated ceramic to destroy waste and bacteria. The electrolysed ewater+ has an antibacterial, cleansing effect.

The PreMist function makes it difficult for dirt and bacteria to accumulate from the outset. The toilet bowl is sprayed with water before use, because dirt does not stick as well to wet ceramic surfaces.

The WASHLET also has a sensor-activated lid which opens and closes by itself, an automatic flush and an adjustable dryer. The heated seat and deodoriser ensure that your visit to the bathroom is more pleasant. The wand for personal cleansing is, of course, individually adjustable. All the functions, including the water jet temperature, pressure and position, can be conveniently adjusted using the remote control.

Of course, the NEOREST toilet's seat isn't kept heated at all times. Instead, a memory function records the user's preferences for 14 days. The toilet then switches to energy-saving mode as required.

The water for the NEOREST WASHLET warm water spray is heated by a continuous-flow water heater instead of being stored in an additional tank. This means unlimited warm water for intimate cleansing.

► Detailed information, p. 164

SG WASHLET

The SG WASHLET offers all the standard features available in all other TOTO WASHLETs. In addition to the characteristic warm water spray, the WASHLET has a heated seat, an odour-absorbing deodoriser, dryer, and the ewater+ function. The WASHLET sprays the toilet bowl with electrolysed water. This antibacterial water prevents waste from accumulating.

Instead of being stored in an additional tank, the water for the SG WASHLET warm water spray is heated by a continuous-flow water heater. This means unlimited warm water for intimate cleansing.

NEOREST

GIOVANNONI WASHLET

This WASHLET is the product of an international design partnership between TOTO and the renowned Italian designer Stefano Giovannoni, uniquely combining functional technology and high-quality Italian design. The WASHLET also offers many of the unique features you'd expect from a TOTO WASHLET, even though you can't tell from the outside. There's a wand with a warm-water jet, a heated

seat, a deodoriser, and a remote control, all of which will bring new levels of comfort, convenience and hygiene to your bathroom. Once you have experienced them, you'll never again want to be without them. The rimless design, Tornado Flush and special CeFiONtect glaze make the WASHLET complete, whilst its aesthetics and functionality ensure that it's a must-have object for any bathroom.

► Detailed information, p. 164

GL 2.0 WASHLET

The GL 2.0 WASHLET can be combined with the TOTO NC and MH toilets.

The WASHLET GL 2.0 features all TOTO comfort technologies, including the adjustable warm water spray, temperature control, different types of sprays, a heated seat, a deodorizer, and drying function. Two users can save preferred settings and activate them at the touch of a button using the remote control.

The toilet bowl is sprayed with water before use, which makes it more difficult for dirt and waste to accumulate.

When not used for extended periods of time, the GL 2.0 WASHLET automatically switches to energy-saving mode.

EK 2.0 WASHLET

The EK 2.0 WASHLET is compatible with the NC and MH series toilets. Users can activate all functions using the side control panel. It is possible to choose the temperature and type of the warm water spray, set the seat temperature and activate the dryer function. The EK 2.0 WASHLET learns the habits of its users and automatically switches to energy-saving mode on this basis. Like all TOTO WASHLETs, it also has an automatic, sensor-activated seat.

SHOWERS

Individual shower preferences are as unique as people's individual tastes for their morning coffee. TOTO offers a wide range of combinations and installation options to ensure that they meet every requirement. There is an ideal solution for every need, from people who take quick, efficient showers to

those who enjoy a more luxurious experience. You can choose from a single to a multifunctional shower head. You can experience a comfortable shower while saving water with our Aerial Shower feature, or enjoy some variety with the Gyrostream and Cascade Flow functions.

► Detailed information, p. 176

SHOWERSYSTEM

The shower system delivers the maximum in flexibility. The individual elements can be combined as desired and are compatible with all TOTO collections.

The large overhead shower embedded in the ceiling has three different types of sprays. It saves a great deal of water for its size. The hand-held units are

available in two different diameters, namely 120 and 150 mm, and offer one or three different types of sprays.

The shower heads are available in round and square shapes, and can be mounted to the ceiling or wall. All overhead showers include the water-saving Aerial Pulse technology.

SHOWERS

The water-saving TOTO shower system can be combined with a wide range of different options. It is the perfect addition to every bathroom.

The large overhead shower embedded in the ceiling has the distinctive Water Pillar function. A heavy, voluminous stream of water flows out of the shower head, enveloping the body like a second layer of skin without splashing.

The shower heads aerate the water to create a fuller flow of water while using the same amount of water.

AUTOMATIC FAUCETS

Although these sensor-activated faucets were originally developed for use in public areas, they work just as well in guest bathrooms.

An integrated sensor is able to detect hand movement and thus ensure that just the right amount of water is

dispensed. It's so finely tuned that it only registers hand movement directly below the spout and, therefore, does not activate the water flow when you're cleaning the washbasin.

A built-in generator harnesses the flow of the water to power the sensor,

eliminating the need to connect it to the power supply.

Our automatic faucets are available with an external control unit which is fitted below the washbasin.

► Detailed information, p. 184

► Award Automatic faucet (2)

Our automatic faucets are available both with and without a thermostat. Models with an external control unit come with a range of flow rates, either as a thermostatic mixer or pre mixed water, single supply Installation.

WASHLET TECHNOLOGIES

WARM WATER SPRAY ADJUSTABLE SELF-CLEANING WAND JET SYSTEM

The wand jet system technology makes it possible to use water for intimate cleansing. The result is an entirely new level of hygiene, because water cleans more thoroughly than paper.

The position, temperature and pressure of the spray can be adjusted as desired. The wand jet cleans itself automatically after use.

Advantages: Everyday comfort, a clean feeling, self-cleaning jet, less paper used

COMFORT SPRAY

The comfort spray is designed to clean the rear part of the intimate area. The jet sprays a single stream of water with strong, yet comfortable pressure – for thorough cleaning without splashing.

SOFT COMFORT SPRAY

This type of spray also cleans the rear part of the intimate area. This stream of water has a larger radius, and cleans a larger area. Less water pressure makes for a soft, gentle cleaning experience.

LADY SPRAY

This spray creates large, soft drops of water for comfortable cleansing. The result: a clean and fresh feeling.

OSCILLATING COMFORT SPRAY

It is possible to turn on the oscillating function parallel to the various spray types. The wand jet moves in and out to thoroughly clean very large areas. For an all-round feeling of cleanliness.

MASSAGE SPRAY

You can also choose the massage function. This changes the water pressure independently, switching between softer and stronger streams of water.

ADJUSTABLE WATER PRESSURE

The water pressure is easily adjusted to five different levels in line with the user's needs.

ADJUSTABLE POSITION

Every user has different needs. You can adjust the position of the wand jet for every user.

CONTINUOUS-FLOW WATER HEATER

Our NEOREST AC and EW WASHLETS as well as the SG WASHLET are equipped with a continuous-flow water heater, which provides unlimited warm water for intimate cleansing.

WASHLET TECHNOLOGIES

HEATED SEAT ADJUSTABLE TEMPERATURE

The temperature of the heated seat can be chosen as desired. The seat even starts warming up before anyone sits down. During extended periods when not in use, such as overnight, it automatically switches to power save mode and reduces the seat temperature. Several models have a memory function that saves daily usage patterns and automatically activates the power save mode on this basis.

Advantages: The ideal temperature at the touch of a button

DEODORISER FILTER SYSTEM TO ABSORB ODOURS

The air purifier ensures that the air around the toilet is kept fresh during and after use by passing it through a powerful, effective filter. The air is sucked in and passed through the filter inside the WASHLET, purifying it and eliminating unpleasant odours.

Advantages: Eliminates unpleasant odours, helps promote a feeling of cleanliness

DRYER WARM AIR JET

The adjustable dryer quickly dries the intimate area after cleansing with the warm water spray.

Advantages: A feeling of well-being, reduces the need for toilet paper

PREMIST MISTS THE TOILET BOWL

The PreMist function ensures the greatest possible hygiene from the very first moment. The toilet bowl is sprayed with water prior to use. This film of water over the CeFiONtect glaze helps eliminate dirt and waste 80 % better with each flush.

Advantages: Less cleaning required, fewer cleansers needed, saves time, cleanliness means greater comfort

AUTO FUNCTIONS SENSOR-ACTIVATED TECHNOLOGIES

For a bathroom to be comfortable, it has to ease the stress of everyday life. TOTO's NEOREST series does just that with its range of integrated, automatic, sensor-activated functions, including the self-opening and -closing toilet lid, the automatic air purifier and the self-activating flush.

These auto functions not only provide ease of use and convenience, but also another key benefit: There's no need to touch the toilet, increasing the level of hygiene in the bathroom.

Advantages: Ease of use, no need to touch the toilet, regulates energy consumption

WASHLET TECHNOLOGIES

EWATER+ ELECTROLYSED WATER WITH ANTIBACTERIAL PROPERTIES

The WASHLET sprays the ceramic with a fine mist of water. The reason: Less sticks to a moist ceramic surface than a dry one. After use, the toilet is sprayed with electrolysed processed water, also known as ewater+. This water has an antibacterial effect. This antibacterial water thoroughly cleans the toilet.

Regular water is electrolysed to give it a slightly acidic pH value. The ewater+ is completely environmentally friendly and can be returned to the water cycle without worry.

Advantages: No chemical additives, antibacterial

ACTILIGHT SELF-CLEANING SURFACE

TOTO has developed a self-cleaning WASHLET with its new Actilight technology. Actilight consists of two phases that actively fight waste and bacteria. Prior to the first use, the WASHLET sprays the toilet bowl with water. Once the toilet is flushed, the WASHLET sprays the bowl with electrolysed water. This water has an antibacterial effect and prevents waste from accumulating. The toilet bowl also has a special hydrophilic zirconium-coated surface, which helps the electrolysed water simply wash the waste away. The toilet lid features a UV light which is activated

once the lid is shut. This light triggers the decomposition process of the waste particles on the zirconium-coated surface. The result – a toilet that stays clean over the long-term.

Advantages: Antibacterial, self-cleaning, breaks down waste

TOILET TECHNOLOGIES

TOTO developed all the toilet technologies used in its products. The company has also continued to improve them consistently since 2002.

These technologies are standard in every TOTO toilet, and ensure the greatest possible hygiene as demonstrated in expert reports and studies.

TORNADO FLUSH HIGHLY EFFECTIVE TWO- OR THREE-JET FLUSH

Tornado Flush is most important feature of each TOTO toilet. Available in two- and three-jet versions, Tornado Flush ensures the greatest possible hygiene and minimise the amount of cleansers needed.

This is possible because the water is used differently in the toilet bowl: Instead of water simply flowing from top to bottom, two or three jets create a powerful whirlpool effect that thoroughly washes away all dirt and waste like a tornado.

In addition to ensuring the greatest possible hygiene, this system is especially quiet and water-saving. One flush is often enough.

Advantages: Very quiet, inspired by nature, the entire bowl is thoroughly cleaned, fewer cleansers required

RIMLESS DESIGN

RIMLESS CERAMIC TOILET BOWLS

TOTO toilet bowls' rimless design helps ensure that dirt and bacteria aren't able to collect in the first place. It also facilitates cleaning by ensuring that all areas of the bowl are easily accessible and minimises the need for toilet cleaner – making cleaning easier for you and kinder to the environment.

Advantages: Easier to clean, minimises the need for toilet cleaner

CeFiONtect

SPECIAL HYGIENIC GLAZE FOR SMOOTH CERAMIC SURFACES

Our special CeFiONtect glaze is applied to all TOTO ceramics, ensuring a long-lasting shine, and most importantly, exceptional hygiene, as it's nearly impossible for dirt and mould to stick to the surface.

This extremely smooth glaze is redefining cleanliness and hygiene on ceramic surfaces. Though invisible to the naked eye, the ridges of untreated ceramic surfaces appear like small mountain ranges under the microscope.

No matter how often you clean them, bacteria build up in the minute crevices of the uneven surface. However, our CeFiONtect glaze creates a smooth surface so that dirt has nothing to hold on to. The special CeFiONtect glaze is applied to the surface before the firing process and is extremely hard-wearing, thus ensuring natural long-lasting surface protection and cleanliness.

Hygiene comes as standard in every TOTO bathroom.

Advantages: Easier to clean, dirt-resistant, minimises the amount of toilet cleaner required

SHOWER TECHNOLOGIES

AERIAL SHOWER AERATED WATER FOR THE SHOWER

Aerial Shower aerates the water to make the shower experience much more enjoyable. You feel as though you're standing below a particularly full stream without any increase in the amount of water being used. Aerating the water is also a clever way of using it more efficiently.

Air is drawn in through the shower head and added to the water, enlarging the water droplets and causing them to increase in volume. This makes it seem as if you are being rinsed with more water, making the shower a more enjoyable experience.

The benefits of Aerial Shower are two-fold: It both reduces water consumption and makes the shower experience more luxurious. This is TOTO technology at its best.

Advantages: Comfortable shower experience, uses less water

AERIAL PULSE

AERATED WATER WITH A PULSATING FUNCTION

TOTO shower heads are equipped with the Aerial Pulse feature, which offers outstanding comfort while using little water. Air is drawn in through the shower head and added to the water. The shower head pulses the enlarged water droplets as they fall for an invigorating and relaxing experience.

Advantages: Reduces water consumption, a more enjoyable shower experience

WATER PILLAR

LIGHT YET VOLUMINOUS STREAM OF WATER

With its Water Pillar technology, TOTO manages to control a single stream of water so that it gently glides over the entire body. The water is slowed down considerably before it leaves the shower head, which makes it far softer when it hits the body – for a far more comfortable experience. This system reduces splashing and ensures an even, steady stream of water.

Advantages: Well-being, gentle shower experience, nearly splash-free, wellness, keeps the entire body warm

SHOWER TECHNOLOGIES

CASCADE FLOW WATERFALL-LIKE SHOWER EXPERIENCE FOR MAXIMUM WARMING EFFECT

Cascade Flow technology creates a shower experience similar to standing under a curved waterfall. A curved slit in the shower head allows a wide stream of water to flow, evenly warming and soothing the entire body for long-lasting relaxation – even after the shower.

Advantages: Consistently warm, luxurious flow of water, outstanding comfort

GYROSTREAM SHOWER NOZZLES WITH ROTATING AND PULSATING FUNCTION

The bathroom is a place where health and well-being take centre stage. Gyrostream transforms the shower into a mini spa. Gyrostream sprays the water through rotating nozzles in a precise, pulsating stream, distributing it more evenly over a wider area. This creates a vortex that continuously rinses the entire body with warm water and, just like in a bathtub, keeps it warm. The powerful water vortices also provide a massaging effect – whether from the jets embedded in the wall or the multifunctional shower head.

Advantages: Massage function, consistently warm shower

FAUCET TECHNOLOGIES

AUTO FUNCTIONS SENSOR-ACTIVATED TECHNOLOGIES

For a bathroom to be comfortable, it has to ease the stress of everyday life. These auto functions not only provide ease of use and convenience, but also another key benefit: There's no need to touch the toilet, increasing the level of hygiene in the bathroom.

Advantages: Ease of use, no need to touch the toilet, regulates energy consumption

SMA MAINTAINS A CONSTANT WATER TEMPERATURE DESPITE FLUCTUATING WATER SUPPLY TEMPERATURES AND PRESSURE LEVELS

With SMA, TOTO can ensure reliability where you need it most: SMA maintains a constant water temperature despite fluctuating water supply temperatures and pressure levels resulting from water being used elsewhere in the home.

The result is a water temperature you can rely on, whether you're in the shower or washing your hands, without having to adjust it manually.

Advantages: Constant, comfortable temperature, reduces water consumption

SELFPOWER SENSOR-ACTIVATED FAUCET THAT CREATES ITS OWN POWER SUPPLY

The sensor-powered no-touch faucets featuring SelfPower technology have their own integrated hydroelectric generator. These faucets generate their own power from the flowing water. As a result, they do not need to be connected to electricity. These faucets combine two technologies in one: A microsensor at the tip of the spout – one of the smallest in the world – regulates the flow of water. In addition, the energy required for the sensor is generated by the faucet itself.

A generator converts the energy from the flowing water to supply the sensor with electricity. In turn, the integrated sensor registers the motion of hands to measure exactly how long the water should flow.

There are two types of SelfPower faucets available: with an external control unit or all hardware integrated into the faucet itself.

Advantages: Easy to use, reduced physical contact, no external power supply, little energy required

ECOCAP FULLER AERATED WATER STREAM

EcoCap allows you to wash your hands with a clean conscience, as this intelligent TOTO technology significantly reduces water consumption.

Here's how it works: Mixing air with water can reduce consumption without any loss in stream volume.

EcoCap enables full flow rates with just 3.6 litres of water.

Advantages: Fuller, satisfying water stream, reduces water consumption

WASHBASIN TECHNOLOGIES

CEFIONTECT SPECIAL HYGIENIC GLAZE FOR SMOOTH CERAMIC SURFACES

Our special CeFiONtect glaze is applied to all TOTO ceramics, ensuring a long-lasting shine, and most importantly, exceptional hygiene, as it's nearly impossible for dirt and mould to stick to the surface.

This extremely smooth glaze is redefining cleanliness and hygiene on ceramic surfaces. Though invisible to the naked eye, the ridges of untreated ceramic surfaces appear like small mountain ranges under the microscope.

No matter how often you clean them, bacteria build up in the minute crevices of the uneven surface. However, our CeFiONtect glaze creates a smooth surface so that dirt has nothing to hold on to. The special CeFiONtect glaze is applied to the surface before the firing process and is extremely hard-wearing, thus ensuring natural long-lasting surface protection and cleanliness.

Hygiene comes as standard in every TOTO bathroom.

Advantages: Easier to clean, dirt-resistant, minimises the amount of toilet cleaner required

LUMINIST TRANSLUCENT EPOXY RESIN MATERIAL

TOTO created an exceptional epoxy resin material: The translucent LUMINIST has a soft, silky texture, but it is extremely durable and heat-resistant. LUMINIST washbasins and bathtubs are extremely long-lasting. LUMINIST can also be used in combination with LEDs, enabling you to use light as a design element in your bathroom.

In fact, it's even used in aircraft construction. Scratch-resistant and highly durable, LUMINIST can withstand temperatures of up to 360°C.

The durability of this material also makes it easy to repair. Scratches can be polished away with ease.

Advantages: Attractive appearance, extremely durable, long-lasting

HYDROTECT

HYDROTECT MORE THAN JUST TILES: ANTIBACTERIAL AND ANTIVIRAL SURFACES FOR HYGIENIC BATHROOMS.

TOTO's Hydrotect technology ensures the greatest possible hygiene – and not just for toilet bowls. HYDROTECT-coated tiles and ceramic plates have antibacterial and antiviral properties, ensuring long-lasting hygiene in frequently used bathrooms.

ANTIBACTERIAL AND ANTIVIRAL

This special hybrid coating activates oxygen and also contains active metals that combat bacteria, viruses and even unpleasant odours. TOTO develops products in collaboration with our partners Casalgrande Padana, Grespania and Laminam, which ensure clean, hygienic surfaces in private and public washrooms.

**BATH CULTURE
FROM JAPAN.
THAT IS TOTO.**

**WHERE INNOVATIVE
TECHNOLOGY MEETS
EXCEPTIONAL DESIGN.**

**TOTO IS JAPAN'S LEADING
MANUFACTURER OF
CERAMIC SANITARYWARE,
AND HAS BEEN AT THE
FOREFRONT OF DEVELOP-
MENTS IN BATHROOM
CULTURE EVER SINCE ITS
ESTABLISHMENT IN 1917.**

LOOKING BACK

1917

The company is established by Kazuchika Okura under the name of TOYO TOKI Co. Ltd., which is later renamed TOTO. Five years previously, in 1912, Okura had set up a laboratory to develop the kind of sanitary ceramics that had become common in Europe and America. Ironically, considering how sophisticated Japanese bathroom culture is today, wooden toilet bowls were still prevalent and there was no sewage system. With its first sales, Okura's company begins challenging accepted notions of cleanliness, something that TOTO continues to do today.

1923

The Great Kanto Earthquake strikes, devastating Tokyo. A sewage system is built during the reconstruction and the demand for sanitary ware grows rapidly.

1946

After World War II, TOTO begins to manufacture metal fittings and faucets as well as ceramics. Ever since, innovation in the field of precision machining technology has gone hand-in-hand with developments in the firing and casting of sanitary ware as two of TOTO's core businesses.

1964

Japan is in the midst of its economic miracle when it hosts the 1964 Tokyo Olympics, and is enjoying the construction boom that accompanies it. TOTO is again at the forefront of bathroom technology, developing the prefabrication methods necessary to meet the need for mass production, which saves time and energy on construction. The modular prefabricated bathrooms TOTO creates for the 1,044 rooms in Tokyo's Hotel New Otani, opened for the Olympics, show how the company has perfected the combination of technology and design.

1977

TOTO's first overseas factory opens: P.T. Surya TOTO Indonesia.

1980

TOTO launches the WASHLET, providing consumers with a whole new level of cleanliness and comfort. It quickly becomes a Japanese cultural and commercial sensation.

1981

Following in the wake of the WASHLET, TOTO starts moving its advanced technology into other products by introducing high-end modular kitchens.

1990

TOTO begins trading in the USA, having already extended into Indonesia, Korea, Thailand, Taiwan, and Hong Kong. TOTO expands its business into China in 1994.

1993

The launch of the NEOREST toilet brings about the fullest realisation yet of the principle of Clean Technology, incorporating the WASHLET and a comprehensive range of TOTO's innovations into a bathroom of the highest aesthetic and performance quality.

1998

TOTO launches HYDROTECT, a patented photocatalytic technology. The material's surface self-cleans and breaks down pollutants in the air, making it ideal for external use. Easy to clean, it eliminates odours and bacteria – making it ideal for internal use, too.

2006

The TOTO Universal Design Research Centre is built. Its purpose is to create new products through an extensive process of customer dialogue and feedback.

2009

TOTO launches in Europe at the ISH Exhibition in Frankfurt, 10–14 March.

2010

TOTO opens its first showroom in Europe, in London.

2013

TOTO launches the first self-cleaning WASHLET at the ISH Exhibition in Frankfurt
