## PROSPERO RASULO

### BIO

Nato a Stigliano di Matera nel 1953. Dopo aver conseguito il diploma all'Accademia di Belle Arti di Brera, apre a Milano nel 1987 uno studio dove si dedica alla pittura, alla scultura e alla scenografia. Collabora con lo studio Alchimia e con Alessandro Mendini e partecipa alle ricerche "Redesign" e "Oggetto banale". Nello stesso periodo lavora con lo Studio Occhiomagico nella progettazione di scenografie per video, foto e mostre. Nel 1987 fonda OXIDO galleria di progetto, arte e architettura. Partecipa a varie manifestazioni nel campo del design. Rasulo, oltre a progettare per le industrie, si esprime anche con sculture, oggetti e pezzi unici proposti da varie gallerie di arte e design. Disegna anche gioielli trasferendo l'originalità del suo segno in ornamenti. Collabora con Gessi dal 2001.

### LA RICERCA STILISTICA, IL DESIGN GESSI

Gessi è riuscita a sviluppare nel tempo un linguaggio suo proprio nel design che la distingue e la caratterizza fortemente per essenzialità di linee e il richiamo a forme primarie naturalmente empatiche. L'attenzione estrema alla perfezione del dettaglio, la perfetta armonia delle linee e delle proporzioni e la conseguente pulizia formale sono i tratti caratteristici che rendono inconfondibile il prodotto Gessi.

La ricerca stilistica condotta da uno stabile team creativo interno, che conosce approfonditamente i processi di lavorazione dell'azienda, ha prodotto una storia di innovazione, e un portafoglio prodotti che coerentemente riflette lo stile Gessi e il suo speciale know how produttivo: un'offerta intimamente coesa che riflette, in ogni prodotto e linea i valori e gli stilemi propri del marchio.

Il lungo sodalizio creativo con il designer e scultore Prospero Rasulo, ha dato vita ai concetti rivoluzionari per l'abitare e gli splendidi design che hanno reso Gessi un riferimento mondiale per il disegno d'interni più innovativo e di glamour.

La filosofia creativa di Gessi guarda oltre la mera funzionalità del prodotto, per comprendere la personalità dello spazio nel quale il prodotto si inserisce. Gessi propone infatti Collezioni di elementi di arredo coordinati in stili uniformi, declinati secondo i temi tipici dei "segni Gessi", dal Rettangolo, all'Ovale, all'organica Goccia.

Ogni elemento, dalla rubinetteria, agli accessori, ai lavabi, specchi e sanitari, condivide la medesima bellezza essenziale delle geometrie, la purezza delle forme, l'armonia delle proporzioni esaltando quindi la capacità espressiva ed evocativa di ogni design.

Con una moltitudine di varianti di gamma e di modello, le Collezioni Gessi creano nuovi standard nella personalizzazione del proprio habitat, che diviene rappresentazione di gusto personale e di stile di vita.

P. Rasulo

*Born in Stigliano di Matera in 1953. After graduating from the Brera Fine Arts Academy in Milan, in 1987 he set up a studio in the same city, devoting himself to painting, sculpture and set design. He worked with Studio Alchimia and Alessandro Mendini, participating in the "Redesign" and "Banal Object" projects. During the same period he created video, photo and exhibit set designs for Studio Occhiomagico. In 1987 he established OXIDO, a design, art and architecture gallery. He participated in various events in the design field. Besides designing for industries, Rasulo creates sculptures, objects and one-off pieces offered by various art and design galleries. He also creates jewels, transferring originality into ornaments. He has been working for Gessi since 2001.*

*Over time, Gessi has developed its own design language, distinguished and characterized by its essential lines and its appeal to naturally empathic primary shapes. The extreme attention to detail, the perfect harmony of the contours and proportions and the resulting clean lines are the characteristics that render each Gessi product unique.*

*The stylistic research that's carried out by an internal design team, with in depth knowrims of the Company's production processes, has yielded a history of innovation, as well as a product portfolio that consistently reflects Gessi's style and its exceptional production know-how. Each intimately cohesive range of products reflects the values and styles of its name.*

*The Company's lengthy creative collaboration with designer and sculptor, Prospero Rasulo, has led to revolutionary lifestyle concepts and splendid designs, which have rendered Gessi a benchmark for the world's most innovative and glamorous interior design elements. Gessi's creative philosophy looks beyond the mere functionality of the product, and seeks to understand the actual personality of the space in which its products are installed. In fact, Gessi offers coordinated collections of furnishing elements in matching styles, interpreted according to the typical themes of the "Gessi Signs", including the Rectangle, the Oval and the organic Droplet.*

*All of the elements, from faucets and accessories to sinks, mirrors and sanitary ware, share the same essential shapes, clean forms and harmonic proportions, thus exalting the expressive and evocative capacity of each design. With a wide range of models and product lines, Gessi Collections have created new standards for customizing living areas, allowing them to become representations of individual tastes and lifestyles.*

## **Cristalplant® RAL Colour**

Materiale "Solid Surface" verniciato esternamente, Bianco Opaco + Colore Personalizzato, Made in Italy  
Solid Surface Material with external laquering, Matt White + Custom Colour, Made in Italy

Cristalplant® Verniciato è un materiale composito tecnologicamente avanzato, non assorbente, ipoallergenico e non tossico, riciclabile al 100%, ignifugo, igienico, resistente e piacevole al tatto per la sua finitura vellutata simile alla pietra naturale. È sufficiente l'uso di acqua e comuni detersivi con una spugna abrasiva per rimuovere macchie e sporco dalla superficie; per la superficie esterna verniciata pulire delicatamente con acqua ed un panno in microfibra.

*Lacquered Cristalplant® is a unique, technologically advanced composite material, non-absorbent, hypoallergenic and non-toxic, 100% recyclable, fireproof, hygienic, durable and pleasant-touching, thanks to its velvety texture, similar to natural stone. It is enough to clean Cristalplant® with soapy water or with household detergents (even abrasive) in order to remove the majority of stains and dirt from the surface; for the external lacquering, we suggest to clean it with water and a microfiber cloth.*

### CARATTERISTICHE TECNICHE:

#### DESIGN:

- Permette la realizzazione di articoli con forme e dimensioni impensabili per la ceramica sanitaria (es. vasche e lavabi free-standing)
- Piacevole al tatto per la sua finitura vellutata simile alla pietra naturale, e superficie esterna personalizzabile nel colore su richiesta del cliente
- Può essere verniciato esternamente in ogni colore RAL

#### QUALITÀ:

- Materiale ECO, completamente riciclabile
- Materiale molto simile al Corian, ma con migliori prestazioni tecniche
- La finitura esterna "RAL Colour" è applicata artigianalmente, tramite una mano di fondo e una di vernice
- Tutta la superficie esterna viene rivestita da un invisibile strato protettivo che protegge l'esclusiva verniciatura sottostante e conferisce un piacevole effetto tattile
- Questa finitura esterna speciale rimane comunque delicata e richiede maggiore attenzione, rispetto ad un prodotto standard
- Non ingiallisce e resiste ottimamente al sole
- Buona resistenza al graffio (1,6 N), in accordo con la normativa UNI 9428:1989
- 100% Made in Italy

#### CURA E MANUTENZIONE:

- Può essere pulito quotidianamente con prodotti non aggressivi e panni delicati
- L'uso di prodotti abrasivi, solventi o agenti aggressivi sulla superficie esterna verniciata, possono compromettere l'integrità dell'esclusiva verniciatura esterna
- Eventuali graffi profondi, necessitano del ripristino della verniciatura

### TECHNICAL FEATURES:

#### DESIGN:

- It allows the creation of products with shapes and dimensions unconceivable for sanitary ceramic (e.g. freestanding bathtubs and washbasins)
- Pleasant to touch thanks to its velvet finish, similar to natural stone, it presents an external surface which is customizable with colours on request
- It can be externally lacquered in any RAL colour

#### QUALITY:

- ECO material, fully recyclable
- Material very similar to Corian, but with better technical performances
- The external "RAL Colour" finish is handmade, using a primer and a high quality paint
- The entire external surface is coated with an invisible layer which protects the exclusive underlying paint and gives it a pleasant tactile effect
- This special exterior finish is still delicate and requires more attention than a standard product
- It does not turn yellow and optimally withstands the sun
- Good resistance to scratches (1.6 N), in agreement with the UNI 9428:1989
- 100% Italian Patent and 100% Made in Italy

#### CARE & MAINTENANCE:

- It can be daily cleaned with a soft cloth and non-aggressive products
- The use of abrasive products, solvents or aggressive agents on the external painted surface may compromise the integrity of the exclusive exterior paint
- Accidental deep scratches may require the restoration of the lacquering of the surface

# TECHNICAL FEATURES

## **Cristalplant®**

Materiale "Solid Surface", Bianco Opaco, Made in Italy  
Solid Surface Material, Matt White, Made in Italy

Cristalplant® è un materiale composito tecnologicamente avanzato, non assorbente, ipoallergenico e non tossico, riciclabile al 100%, ignifugo, igienico, resistente e piacevole al tatto per la sua finitura vellutata simile alla pietra naturale. È sufficiente l'uso di acqua e comuni detergenti con una spugna abrasiva per rimuovere macchie e sporco dalla superficie.

*Cristalplant® is a unique, technologically advanced composite material, non-absorbent, hypoallergenic and non-toxic, 100% recyclable, fireproof, hygienic, durable and pleasant-touching, easy on the hands for its velvety texture, similar to natural stone. It is enough to clean Cristalplant® with soapy water or household detergents (even abrasive) in order to remove the majority of stains and dirt from the surface.*

### CARATTERISTICHE TECNICHE:

#### DESIGN:

- Permette la realizzazione di articoli con forme e dimensioni impensabili per la ceramica sanitaria (es. vasche e lavabi freestanding)
- Piacevole al tatto per la sua finitura vellutata simile alla pietra naturale
- Può essere tagliato e giuntato permettendo la personalizzazione su misura senza che le giunture siano visibili
- Troppopieno a taglio, integrato nello spessore di vasca o lavabo

#### QUALITÀ:

- Materiale ECO, completamente riciclabile
- Materiale molto simile al Corian, ma con migliori prestazioni tecniche
- Non assorbe
- Resistente agli impatti
- Non ingiallisce e resiste ottimamente al sole
- Ignifugo (Classe 1)
- Resiste al calore intenso fino a 140°C
- Specifica formulazione e tecnologia produttiva che soddisfa ed eccede le restrittive normative europee per l'arredo bagno (es. vasche e lavabi)
- Brevetto 100% italiano e 100% Made in Italy

#### CURA E MANUTENZIONE:

- Può essere pulito quotidianamente con i normali prodotti in commercio, anche abrasivi
- Le bruciature e le macchie più ostinate possono essere rimosse con l'ausilio di una comune spugna abrasiva
- Eventuali graffi, anche profondi, possono essere eliminati con facilità

### TECHNICAL FEATURES:

#### DESIGN:

- It allows the creation of products with shapes and dimensions unfit for sanitary ceramic (e.g. freestanding bathtubs and washbasins)
- Pleasant to touch due to its velvet finish, similar to natural stone
- Pieces can be split and invisibly joint, allowing customization
- Integrated slot overflow in the thickness of the washbasin or bathtub

#### QUALITY:

- ECO material, fully recyclable
- Material very similar to Corian, but with better technical performances
- Does not absorb
- Shock resistant
- Does not turn yellow and optimally stands the sun
- Fireproof (Class 1)
- Resistant to intense heat up to 140°C
- Specific formulation and productive technology, exceeding restrictive European regulations for bathroom furniture (e.g. bathtubs and washbasins)
- 100% Italian Patent and 100% Made in Italy

#### CARE & MAINTENANCE:

- Clean daily with standard products, even abrasive products
- Burns and stubborn stains can be removed with a standard abrasive sponge (e.g. Scotch Brite)
- External scratches, even deep ones, can be easily removed

# TECHNICAL FEATURES

## Ceramilux®

Materiale "Gel Coat", Bianco Lucido, Made in Italy  
Gel Coat Material, Gloss White, Made in Italy

Ceramilux® è un materiale composito tecnologicamente avanzato, non assorbente, ipoallergenico e non tossico, riciclabile al 100%, ignifugo, igienico, resistente e piacevole al tatto per la sua finitura simile alla ceramica sanitaria. È sufficiente l'uso di acqua e comuni detergenti con una spugna non abrasiva per rimuovere macchie e sporco dalla superficie.

*Ceramilux®, is a unique, technologically advanced composite material, non-absorbent, hypoallergenic and non-toxic, 100% recyclable, fireproof, hygienic, durable and pleasant-touching, easy on the hands for its texture, similar to sanitary ceramic. It is enough to clean Ceramilux® with soapy water or household detergents (not abrasive) in order to remove the majority of stains and dirt from the surface.*

### CARATTERISTICHE TECNICHE:

#### DESIGN:

- Permette la realizzazione di articoli con forme e dimensioni impensabili per la ceramica sanitaria (es. vasche e lavabi freestanding)
- Piacevole al tatto per la sua finitura lucida, comparabile alla ceramica sanitaria, eccezionale brillantezza
- Può essere tagliato e giuntato permettendo la personalizzazione su misura senza che le giunture siano visibili
- Troppopieno a taglio, integrato nello spessore di vasca o lavabo

#### QUALITÀ:

- Materiale ECO, completamente riciclabile
- Materiale dotato di spesso strato di gel-coat che crea un resistente strato lucido
- Non assorbe e non si macchia
- Non ingiallisce e resiste ottimamente al sole
- Ignifugo (Classe 1)
- Resiste al calore intenso fino a 120°C
- Specifica formulazione e tecnologia produttiva che soddisfa ed eccede le restrittive normative europee per l'arredo bagno (es. vasche e lavabi)
- Brevetto 100% italiano e 100% Made in Italy

#### CURA & MANUTENZIONE:

- Può essere pulito quotidianamente con i normali prodotti in commercio, non abrasivi
- Leggeri graffi superficiali, possono essere eliminati con facilità, quelli più profondi necessitano di adeguata riparazione

### TECHNICAL FEATURES:

#### DESIGN:

- It allows the creation of products with shapes and sizes unfit for sanitary ceramic (e.g. freestanding bathtubs and washbasins)
- Beautifully shiny and white, looks like traditional ceramic, through its glossy finish
- Can be cut and invisibly joint, allowing customization
- Integrated slot overflow in the thickness of the washbasin or bathtub

#### QUALITY:

- ECO material, fully recyclable
- Material with thick and resistant glossy gel-coat
- Does not absorb or stain
- Does not turn yellow and optimally stands the sun
- Fireproof (1 Class)
- Resistant to intense heat up to 120°C
- Specific formulation and productive technology, satisfying and exceeding the restrictive European regulations for bathroom furniture (e.g. bathtubs and washbasins)
- 100% Italian Patent and 100% Made in Italy

#### CARE & MAINTENANCE:

- Clean daily with standard non-abrasive products
- Eventual surface scratches can be removed easily, while the thickest ones need a suitable repairment

# TECHNICAL FEATURES

## *Ceramica Sanitaria / Sanitary Ceramic*

Vitreous China & Fireclay, Bianco Lucido, Made in Italy

Vitreous China & Fireclay, Gloss White, Made in Italy

La ceramica sanitaria è un materiale naturale, realizzato con acqua e argilla ed utilizzato da secoli. E' un materiale estremamente igienico, dotato di uno smalto ultra resistente che garantisce prestazioni superiori a qualsiasi altro materiale non ceramico. È sufficiente l'uso di acqua e comuni detergenti con una spugna anche leggermente abrasiva per rimuovere macchie e sporco dalla superficie.

*The sanitary ceramic is a natural material, made by water and clay, used for centuries. It is an extremely hygienic material, endowed with an ultra-resistant glaze that provides better performances than any other non-ceramic material. It is enough to clean it with soapy water or household detergents (even abrasive) in order to remove stains and dirt from the surface.*

### CARATTERISTICHE TECNICHE:

#### DESIGN:

- Permette la realizzazione di articoli di grande design, e vincolati da restrittive normative, come vasi e bidet, che non possono essere realizzati in altri materiali
- Superficie smaltata, piacevolmente liscia e igienica
- E' il materiale tradizionalmente più apprezzato per gli elementi funzionali dell'arredo bagno
- Troppopieno, integrato nello spessore del lavabo

#### QUALITA':

- La ceramica è di per sé un prodotto naturale, realizzato con acqua e argilla, ed utilizzato da secoli
- Materiale dotato di smalto ultra resistente che garantisce prestazioni superiori a qualsiasi altro materiale non ceramico
- Non assorbe e non si macchia
- Resistente ai graffi e all'abrasione
- Brillantezza e purezza caratteristiche della produzione italiana, ancora ineguagliate
- Non ingiallisce, materiale praticamente eterno
- Resiste al calore intenso e alle bruciature
- 100% Made in Italy

#### CURA & MANUTENZIONE:

- Può essere pulito quotidianamente con i normali prodotti in commercio, anche leggermente abrasivi
- Anche le macchie più ostinate possono essere rimosse facilmente con i più comuni prodotti

### TECHNICAL FEATURES:

#### DESIGN:

- It allows the creation of products of great design (e.g. toilets and bidets), bound by restrictive regulations, which can not be made of other materials
- Nicely smooth and hygienic glazed surface
- It is traditionally the most valued material because of its functionality in the bathroom
- Overflow integrated in the thickness of the washbasin

#### QUALITY:

- Ceramic is in itself a natural product, made with clay and water and used for centuries
- Material with ultra-resistant glaze, ensuring better performance than any other non-ceramic material
- It does not absorb and does not stain
- Resistant to scratches and abrasion
- Still unmatched shining and purity, typical of Italian production
- It does not turn yellow, it is practically an eternal material
- Resistant to intense heat and burns
- 100% Made in Italy

#### CARE & MAINTENANCE:

- Clean daily with non-aggressive products and delicate clothes
- Also the most stubborn stains can be easily removed with the use of the most common products

# TECHNICAL FEATURES

## Gres

Gres Semi-opaco, Bianco/Nero Gessi, Made in Italy  
Semi-Opaque Gres, White/Black Gessi, Made in Italy

Il gres è un materiale naturale, realizzato con acqua e argilla ed utilizzato da secoli. E' un materiale estremamente igienico, dotato di uno smalto ultra resistente che garantisce prestazioni superiori a qualsiasi altro materiale non ceramico. È sufficiente l'uso di acqua e comuni detergenti con una spugna anche leggermente abrasiva per rimuovere macchie e sporco dalla superficie.

*Gres is a natural material, made by water and clay, used for centuries. It is an extremely hygienic material, endowed with an ultra-resistant glaze that provides better performance than any other non-ceramic material. It is enough to clean it with soapy water or household detergents (even abrasive) in order to remove stains and dirt from the surface.*

### CARATTERISTICHE TECNICHE:

#### DESIGN:

- Permette la realizzazione di articoli di grande design, caratterizzati da bordi particolarmente sottili e finiture superficiali ricercate
- Superficie smaltata, semi opaca e connotata in colori esclusivi Gessi, gradevole al tatto
- Come la ceramica sanitaria, è materiale tradizionalmente apprezzato per gli elementi funzionali dell'arredo bagno

#### QUALITÀ:

- Il gres è di per sé un prodotto naturale, realizzato con acqua e argilla, ed utilizzato da secoli
- Materiale dotato di smalto ultra resistente che garantisce prestazioni superiori a qualsiasi altro materiale non ceramico
- Non assorbe e non si macchia
- Resistente ai graffi e all'abrasione
- Brillantezza e purezza caratteristiche della produzione italiana, ancora ineguagliate
- Non deteriora nel tempo, materiale praticamente eterno
- Resiste al calore intenso e alle bruciature
- 100% Made in Italy

#### CURA & MANUTENZIONE:

- Può essere pulito quotidianamente con i normali prodotti in commercio, anche leggermente abrasivi
- Anche le macchie più ostinate possono essere rimosse facilmente con i più comuni prodotti

### TECHNICAL FEATURES:

#### DESIGN:

- It allows the creation of products of great design, characterized by very thin edges and special surface finishes
- Semi-opaque glazed surface with exclusive Gessi colours, pleasant to touch
- Like sanitary ceramic, gres is a material traditionally valued for its technical performances

#### QUALITY:

- The Gres is in itself a natural product, made with clay and water and used since centuries
- Material with ultra-resistant glaze, ensuring better performance than any other non-ceramic material
- Does not absorb or stain
- Resistant to scratches and abrasion
- Still unmatched shining and purity, typical of Italian production
- Does not deteriorate over time, it is practically an eternal material
- Resistant to intense heat and burns
- 100% Made in Italy

#### CARE & MAINTENANCE:

- Clean daily with non-aggressive products and delicate clothes
- Also the most stubborn stains can be easily removed with the use of the most common products

## Gres Platino

Gres Platino, Platino lucido, Made in Italy  
Gres Platinum, Bright Platinum, Made in Italy

Il gres è un materiale naturale, realizzato con acqua e argilla ed utilizzato da secoli. La finitura in vero platino è applicata artigianalmente, tramite due mani di verniciatura a pennello e la superficie è rivestita da un invisibile strato silicico nano molecolare che protegge la preziosa finitura. Per la pulizia quotidiana è necessario pulire delicatamente con acqua ed un panno in microfibra.

*Gres is a natural material, made by water and clay, used for centuries. The true platinum finishing is varnished by hand, using two layers of paint and the surface is then coated by an invisible nano-molecular silicone layer that protects the precious finishing. For daily cleaning is necessary to clean with water and a microfiber cloth.*

### CARATTERISTICHE TECNICHE:

#### DESIGN:

- Permette la realizzazione di articoli di grande design, caratterizzati da bordi particolarmente sottili e finiture superficiali ricercate
- Superficie smaltata, lucida e rivestita da una esclusiva verniciatura in vero platino 18 carati
- Il design esclusivo e la finitura platino trasformano il lavabo in una vera e propria scultura gioiello

#### QUALITÀ:

- Il gres è di per sé un prodotto naturale, realizzato con acqua e argilla, ed utilizzato da secoli
- La finitura in vero platino è applicata artigianalmente, tramite due mani di verniciatura a pennello
- I pezzi vengono successivamente cotti in forno per fissare la finitura
- Infine tutta la superficie viene rivestita da un invisibile strato silicico nano molecolare che protegge la preziosa finitura
- Questa finitura speciale rimane comunque delicata e richiede maggiore attenzione, rispetto a un prodotto standard
- La finitura conserva le caratteristiche intrinseche del platino, non ossida e si mantiene lucente
- 100% Made in Italy

#### CURA & MANUTENZIONE:

- Può essere pulito quotidianamente con prodotti non aggressivi e panni delicati
- L'uso di prodotti abrasivi, solventi o agenti aggressivi, possono compromettere l'integrità del prezioso rivestimento in platino

### TECHNICAL FEATURES:

#### DESIGN:

- It allows the creation of products of great design, characterized by very thin edges and special surface finishes
- Gloss glazed surface, coated with a unique varnishing made of true platinum (18 carat)
- The exclusive design and the platinum finish transform the washbasin in a true jewel-sculpture

#### QUALITY:

- The gres is in itself a natural product, made with clay and water and used for centuries
- The platinum finish is applied by hand, using two coats of paint brush
- The pieces are then fired in the kiln to fix the finishing
- Finally, the entire surface is coated with an invisible nano-molecular silicone layer that protects the precious finish
- The special finish is evenly delicate and requires more attention than a standard product
- The finish preserves the intrinsic characteristics of platinum, does not oxidize and remains shiny
- 100% Made in Italy

#### CARE & MAINTENANCE:

- Clean daily with non-aggressive products and delicate clothes
- The use of abrasive, aggressive products or solvents, can compromise the integrity of the precious platinum coating

# TECHNICAL FEATURES

## **Structural®**

Resina poliuretana avanzata, semi-opaca, Made in Italy  
Advanced Poliurethane Resins, semi-opaque, Made in Italy

Structural® è una resina poliuretana tecnologicamente avanzata, impermeabile e non attaccabile da umidità e muffe, ignifugo, igienico, resistente e piacevole al tatto. La sua finitura è coordinata ai lavabi abbinati. È sufficiente l'uso di acqua e comuni detergenti con una spugna non abrasiva per rimuovere macchie e sporco dalla superficie.

*Structural® is a technologically advanced Poliurethane resin, waterproof, not attachable by moisture and mold, fireproof, hygienic, durable and pleasant-touching. Its finishing matches washbasins. It is enough to clean Structural® with soapy water or household detergents (not abrasive) in order to remove of stains and dirt from the surface.*

### CARATTERISTICHE TECNICHE:

#### DESIGN:

- Permette la realizzazione di articoli con forme, spessori e dimensioni impensabili per il legno o altre materie plastiche (es. specchi, accessori, etc.)
- Piacevole al tatto per la sua finitura coordinata ai lavabi della serie
- Leggero e molto resistente al tempo stesso, risulta ideale per tutti quei prodotti che si installano in sospensione

#### QUALITÀ:

- Smaltimento assimilabile ai normali rifiuti urbani
- Specifico per ambienti umidi come la nautica e il bagno (spa, hammam, ed esterni)
- Resistente agli impatti
- Non ingiallisce
- Ignifugo (Classe B2)
- Resiste al calore intenso fino a 140°C
- Brevetto 100% italiano e 100% Made in Italy

#### CARE & MAINTAINANCE:

- Può essere pulito quotidianamente con i normali prodotti in commercio, non abrasivi
- L'uso di prodotti abrasivi, solventi o agenti aggressivi, possono compromettere l'integrità della verniciatura superficiale

#### VANTAGGI RISPETTO AL LEGNO O MDF:

- Gli specchi in legno o mdf, dopo una breve permanenza in un ambiente umido come il bagno di casa, si gonfiano, si crepano e in breve tempo richiedono la loro sostituzione.
- Gli specchi Gessi mantengono inalterate le loro caratteristiche nel tempo

### TECHNICAL FEATURES:

#### DESIGN:

- It allows the creation of products with shapes and sizes unfit for wood or other plastics (e.g. mirrors, accessories)
- Pleasant to touch, due to its matching finish with washbasins.
- Light and very resistant at the same time, it is ideal for all the products that needing wall-hung installation

#### QUALITY:

- Specific for wet environment, such as nautics and bathrooms (spa, hammam, and outdoor)
- Shock resistant
- Does not turn yellow and optimally stands the sun
- Fireproof (B2 Class)
- Resistant to intense heat up to 140°C
- 100% Italian Patent and 100% Made in Italy

#### CARE & MAINTENANCE:

- Clean dealy with standard non-abrasive products
- The use of abrasive and aggressive products or solvents may damage the surface varnishing

#### ADVANTAGES OVER WOOD OR MDF:

- After short staying in wet environments like bathroom, wood or mdf mirrors crack, swell and require replacement.
- Gessi mirrors maintain their premium features in the time
