teuco

teuco bathrooms the pleasure of feeling at home

There is a special place that awaits you.

It stands within the walls of your home,

but its embrace knows

no boundaries.

It has no voice,

but it could tell a lot about you.

Come in.

Let everyday life slip away.

Begin a new dialogue with the shapes,

the colours and the feelings

inspired by a style that is your own,

and through your thoughts,

has become ours.

Turn every day into a small tribute to your own desires.

teuco

history

Untiring creativity, a propensity for new ideas, painstaking design, ergonomic appeal and choice materials: these are the inspiring principles of Teuco. A brand that has continuously anticipated trends and techniques, a story of innovation filled with a host of major international acknowledgements. Teuco's many patents make whirlpool history and, in just a few years, the brand becomes one of the world leaders of well-being.

1974

Teuco gains in popularity when the **MoMa** exhibits the Doccia Tonda (round shower) made of coloured methacrylate, Teuco's most representative symbol of Italian style applied to design and technology.

MoMA
The Museum of Modern Art

1994

Teuco focuses on composite materials, and on **Duralight®** in particular, owing to their excellent performance levels. In 1994, Teuco started up its first production plant dedicated to this material, producing it both in slab form as well as moulds for companies in the furniture industry. Ever since, Teuco has had exclusive rights to formulate and process **Duralight®**.

2006

When the patent for Hydrosilence® - the first and only truly silent whirlpool - was registered, many well-being enthusiasts welcomed this new idea of a whirlpool which affords the sole sound of flowing water.

Teuco invents the invisible whirlpool. Hydroline is the first patented system where the classic nozzles have been replaced by minimalist slits which ensure the continuity of the material. An elegant styling idea which retains all the efficiency of the best whirlpool on the market.

1972

Teuco is established and a new bathroom concept takes shape.

r ti

1980

is launched.

A few years later, the functionality and comfort of showers and bathtubs are significantly enhanced thanks to the introduction of electronics.

The first **Turkish bath** in an enclosure

ne functionality and

1995

The year the **Hydrosonic®** was patented. No-one else had until then teamed whirlpool baths with the benefits of high frequency sound waves.

2009

Rotator by Ron Arad is exhibited at the MAK Museum in Vienna.

2010

Following the success of the **bathroom collection** designed by J. M. Wilmotte, Teuco decides to focus on the total designer look. This project has led to the expansion of the range over the years, including the conception of the Nauha, Paper and Outline collections. And the success continues.

2013

Teuco surpasses itself by applying the exclusive **Hydroline** patent to acrylic bathtubs too.

know-how

AN ELUSIVE MATERIAL, A CONSTANTLY EVOLVING THOUGHT.

Nothing changes more than water, nothing is more indefinable than desire.

Teuco knows that the needs of those who love to pamper themselves and recharge their batteries in water are ever-changing.

That is why it has learned to mould shapes and technologies to turn every bathroom into a unique, highly personal space.

Its aptitude for research has led Teuco to devise an extraordinary material such as Duralight[®], a versatile service like Unlimited, the three patented systems, Hydroline, Hydrosilence[®], Hydrosonic[®] and the first Turkish bath in an enclosure.

So Teuco does not merely stand for beauty and design, but most of all for flexibility, innovation and safety. To cater to the needs of those who want the most from water.

know-how

The nozzles can swivel to direct the massage towards specific parts of the body.

The Hydroline whirlpool stands out for:

- 400 grams of pressure per nozzle, which is tantamount to a professional hand massage;
- Hydro Clean System, in other words the hermetic sealing of suction and jets when the whirlpool is not in operation. The cleanliness of the circuit is also ensured when the bathtub is used without the whirlpool. It is patented by Teuco.
- Automatic sanitising, the system which introduces a sanitising solution into the system and disinfects the pump, the jets and the surface of the bathtub.
 Supplied as standard on all whirlpool systems.

Hydroline is a styling intuition that affords maximum whirlpool efficiency thanks to Teuco's experience and research expertise.

know-how

HYDROLINE

TEUCO SURPASSES ITSELF.

Teuco has invented Hydroline, the invisible whirlpool.

A revolutionary idea which is not only available on products in Duralight[®], the innovative composite material produced by Teuco, but also on acrylic bathtubs.

Hydroline Hydrosonic®

8 whirlpool jets + 6 ultrasound jets, all flush-fit. Hydrosonic® makes the massage penetrate beneath the skin, so your whole body can benefit from it. Thanks to the effect of ultrasound teamed with the whirlpool, it encourages lymphatic drainage, thus preventing the formation of metabolites (one of the causes of cellulite), speeds up muscle recovery after exercise, improves cellular metabolism. Intense and profound benefits for the body and total relaxation for the mind thanks to the built-in Cromoexperience, which lights up the bathtub's 14 jets in your favourite colour, for an experience that involves all your senses. Hydroline Hydrosonic® is always Hydrosilence®.

know-how

HYDROLINE

Cromoexperience

Hydroline is particularly appealing for its exceptional combination of innovation and design. This harmony is expressed at its very best in the innovative Cromoexperience system. The ultra-thin slits in the whirlpool bath light up with beams of light which can be adjusted in eight different colours. The bright colours of the rainbow therefore allow you to enjoy moments of relaxation while you re-discover your inner self.

Pictured: Wilmotte bathtub with Hydroline

know-how

HYDROLINE

A HOST OF SOLUTIONS, ALL FEATURING HYDROLINE.

Hydroline allows you to pick your favourite massage owing to the wide choice of configurations available, which can all be combined with Cromoexperience.

Hydroline Basic

6 flush-fit jets that guarantee the beneficial effects of the best Teuco whirlpool. Styling and functionality have reached the best partnership ever.

Hydroline Hydrosilence®

8 flush-fit jets providing the pleasure of a whirlpool with only the sound of flowing water.

Noise emissions are reduced by 70%, for total relaxation.

Hydrosilence[®] eliminates all artificial noise generated by the system along with all vibrations, so you can even pamper yourselves in the evening or at night, without disturbing anyone. Silent does not mean less powerful.

On the contrary, Hydrosilence[®] is even more efficient thanks to "myhydro", a function that allows you to control the intensity of the massage by adjusting the quantity of water in the jet, and the quantity of air in proportion. All this also makes for lower energy consumption.

HYDROSILENCE®

R Hydrosilence® is an exclusive Teuco patent.

know-how

HYDROSILENCE®

WELL-BEING IS EXPRESSED IN SILENCE.

Just a little more than rustling leaves, a whisper, a light breeze.

With Hydrosilence[®], the only sound the whirlpool makes is that of flowing water (test performed in compliance with DIN 4109).

Hydrosilence® eliminates all artificial noise at source: the sound emissions in the tub are reduced by 70% compared to regular whirlpool systems.

The tub makes no noise and does not vibrate, for comfort without compromise, not just for you, but also for those around you: no nuisance in the evening or at night.

Thanks to the "myhydro" function, the intensity can be changed by adjusting the quantity of water in the jet, and the quantity of air in proportion. The perfect balance of water and air, for a more effective result.

25 dbA, like the rustling of paper: Teuco's silence is certified by the FRAUNHOFER INSTITUT in Stuttgart.

Hydroline on acrylic bathtubs is a revolution, but it's not the only one. Hydroline is now also Hydrosonic®: the minimalist design of the flush-fit nozzles is completed by all the efficiency of an ultrasound whirlpool. Hydrosonic® is a project by Teuco which is unique across the globe, ensuing from years of studies and research, ongoing honing and scrupulous testing.

WITH ITS 4 MASSAGE PROGRAMMES, HYDROSONIC® CAN MEET YOUR EVERY NEED:

- > beauty, as an anti-cellulite treatment;
- > after-sport, to stretch your muscles;
- > anti-stress, for moments of pure relaxation;
- > tone-up, to boost your metabolism.

know-how

HYDROSONIC®

TRUE BEAUTY IS NEVER ONLY SKIN DEEP.

THE ONLY WHIRLPOOL IN THE WORLD WITH ULTRASOUND.

Thanks to the effect of ultrasound teamed with the whirlpool, Hydrosonic® makes the massage penetrate beneath the skin, affecting your whole body. A deep and intense treatment, for total well-being.

Hydrosonic® reaches far beyond traditional whirlpools because its ultrasound waves can even stimulate individual body cells. The result is an even massage over your whole body, intense and deep, up to 2/3 cm below the epidermis.

R Hydrosonic® is an exclusive Teuco patent

Duralight® & unlimited

A FAR-REACHING STORY.

Duralight® is an innovative acrylic-based composite material, patented by Teuco. Its special characteristics are due solely to the brand's research and precious knowhow of new materials. The Duralight® formula is unique, just like the technologies which Teuco uses to process it. It is ideal for creative uses, innovative designs and applications which stand the test of time, in residential and commercial environments, from hotels to shops, yachts and airports. Teuco produces Duralight® in-house: it can therefore work it with patented processing technologies, including traditional methods. This enables the implementation of the best design solutions at all times, with the ability to choose complex forms, large objects and curved forms without joints, considerable thicknesses without adhesive, and customised products and installations.

DURALIGHT®: GENERAL CHARACTERISTICS AND STRENGTHS.

SURPRISING TO THE TOUCH. Its warm tactile sensation enhances the pleasure of contact with water.

VISUALLY APPEALING. The fluid, joint-free forms are eye-catching.

LONG-LASTING. Unfading colour under both natural and artificial light.

NON-TOXIC. When exposed to normal temperatures, it does not release fumes.

HYGIENIC AND EASY TO CLEAN. Compact and non-porous across its entire thickness, it is resistant to external agents and is therefore easy to clean.

GOOD AS NEW RIGHT AWAY. The surfaces can be restored to mint condition by using a delicate abrasive detergent and an abrasive sponge.

know-how

Duralight® & unlimited

REVOLUTIONISING THE WORLD OF SOLID SURFACE MATERIALS.

Duralight® - an acrylic-based composite material - patented, produced and processed entirely by Teuco, combines superior performance with luxurious styling appeal. Contact with Duralight® affords unexpected sensations, owing to its "warmth", like natural stone, conveyed by the smooth, continuous surfaces.

A material devised to accommodate the desire to turn the bathroom into a highly personalised setting and to create products that blend in seamlessly with any décor.

Unlimited makes it possible to invent precision-engineered bespoke products, including out of square. But that's not all. It means creating without restrictions on form and function, stepping away from the logic of mere utility and stepping into the sphere of

(R) Duralight[®] is an exclusive Teuco patent.

THE TURKISH BATH

POWER AND TEMPERATURE The research performed by Teuco has led to three different

The research performed by Teuco has led to three different systems designed to suit all shower enclosure dimensions.

The power rating of between 2.5 and 5.5 kW makes it possible to ensure an optimal temperature (of between 45 and 50 °C) at all times and a large quantity of steam (100%). But that's not all. As part of its Spa@home offering, Teuco also offers Pasha, a steam room which can be configured in any size, thanks to the possibility of managing power ratings of up to 36kW.

Pasha allows you to have a genuine spa in your own home. Thanks to the air recirculation system, a fan extracts the warm air and releases it continuously in a downwards direction: this makes sure the temperature remains uniform throughout the entire treatment.

AN ENJOYABLE, RELAXING AND BENEFICIAL RITUAL

Teuco Turkish baths not only afford moments of relaxation, but also beneficial effects for the appearance of your skin and the health of your respiratory tract. Aromas and essential oils can be added to the steam, thus stimulating your sense of smell too.

CROMOEXPERIENCE

A lighting system is also available, which teams the steam or water massages with an experience that regenerates body and mind.

know-how

THE TURKISH BATH

A GREAT IDEA BY TEUCO, FOR THIRTY YEARS.

The first ever company to bring steam into a shower enclosure thanks to electronics, Teuco's know-how is constantly being honed. Teuco creates and patents exclusive solutions which observe the principles of heat therapy, of the Turkish bath and in a logic that focuses on saving energy.

The Turkish bath in a shower enclosure, a world exclusive by Teuco, is further enhanced by a complete range of Cromoexperience solutions and Bluetooth.

WHEN AN IDEA GIVES RISE TO A ROOM

Teuco inaugurates a brand new comprehensive range by imagining the "total look" of your bathroom. A matching suite designed by the same hand, devised to blend in with any setting thanks to the flexibility of the solutions available.

Doing away with individual bathroom fixtures and focusing on a strong styling identity that steps away from mere functionality to satisfy all the senses.

Hence the development of significant collections: Suit by Matteo Nunziati,
Outline by Carlo Colombo, Paper by Giovanna Talocci, Wilmotte by J.M. Wilmotte,
and Nauha designed by Angeletti-Ruzza.

SHOWER TRAYS unlimited [€]

The shower tray, with its minimalist design and clean-cut geometries, affords unexpected sensations to the touch. Thanks to the exclusive Unlimited service and to Duralight[®], the material used to produce it, it can be customised to the nearest centimetre, including out-of-square.

from 90x70 to 200x100 cm

collections SUIT

FURNITURE

Suit furniture accommodates the styling and functionality requirements of the contemporary bathroom.

It is available in several colours, and it stands out for its beguiling appeal and elegance in the wood finishes (the new Hickory walnut and the 3 shades of oak). The 45° cut edges enhance the appeal of its design, making the Suit cabinet a unique piece of furniture.

Practical and sturdy, it comprises drawers fitted with a soft-closing mechanism and built-in high-quality shock absorber. The cabinet was designed to house the Suit wash basin, but it is also the perfect partner for all the other Duralight[®] and ceramic wash basins in Teuco's collection.

60x50 cm / 80x50 cm / 100x50 cm / 120x50 cm / 140x50 cm

THE CHARM OF IRREGULARITY

The light and dynamic balances which distinguish the collection designed by Carlo Colombo renovate the styling of the bathroom with a surprising new design. The rectangular bathtub, made entirely of Duralight[®], affords unique sensations thanks to Hydroline, the first ever invisible whirlpool. Its minimalist and elegant backlit slits also afford a relaxing coloured effect.

BATHTUBS

Available in a generous six different sizes and in over thirty different panel colour solutions, the Outline bathtub embodies in the best possible way the charm of Duralight, the elegance of Hydroline and the relaxing well-being of Hydrosilence and Cromoexperience.

WASH BASINS

The wash basins feature pure and harmonious shapes, which blend in perfectly with the collection, devised to renovate the look of any bathroom. Available in both the flush-fit and the sit-on versions. In the photo: flush-fit wash basin.

from 178x79 to 200x80 cm 89x47 / 89x53 / 74x47 / 74x53 cm

DESIGNED TO AFFORD UNIQUE SENSATIONS.

The asymmetrical edges in the collection enhance the beauty of every component, from the shower trays to the sanitary fixtures, as well as the wash basins, which are also available in the flush-fit version. The irregularity of the material is therefore enhanced by an apparently casual movement which recalls flowing water.

SHOWER TRAYS unlimited

The shower tray features a brand new beguiling design, an original solution to cover the drain and the exclusive finished floor installation technology. Thanks to the Unlimited service, an unlimited range of bespoke solutions customised to the nearest centimetre is available.

SANITARY FIXTURES

The sanitary fixtures, with their light and dynamic equilibriums, feature all the charm of Outline's design. They are available in both the glossy and matt versions for a matt finish that matches all the other Duralight[®] fixtures in the collection.

156 NEXT⁺ **☼ ∦**

The Next+ shower enclosure range, designed by Gioacchini design, sees transparency as the distinguishing feature, thanks to the wide glass wall panels, post-less frame and transparent seals. Despite its smaller size, the Next+ 156 offers maximum freedom of movement. In addition, its corner shape means it can be installed in any bathroom.

90x90 cm

products / showers

157 NEXT+

Like the corner version, the rectangular version of the Next+ shower enclosure range emphasises the light design by Gioacchini design. Glass wall panels, a post-less frame and transparent seals make it perfect for those who appreciate fully functional spaces.

COMBI UNITS

DETAILS THAT MAKE THE DIFFERENCE

Functional shower enclosure.

There is nothing better than a comfortable and practical shower space to give your energy levels a boost every day.

Comfortable and relaxing bathtub.

Pampering yourselves while relaxing and recuperating in a bathtub is pure pleasure, especially when the experience is further enhanced by Teuco's silent whirlpool; 25 dBA to enjoy the only sound of flowing water, certified by the Fraunhofer Institut.

Seats.

Combi units can also be used whilst seated, making them even more practical and safe.

Model 383 features a built-in seat, whereas rectangular models 382, 384 and 385 feature a removable seat.

Safe use is further guaranteed by the wall-mounted hand rail.

Easier access through the wide door.

Getting into Teuco combi units is easy and safe, thanks to the full-height door which makes it easier to get into the bath without having to climb over the side. The step is just 13 cm high. Safe use is further guaranteed by the wall-mounted hand rail.

Long-lever access handle: minimum effort, maximum safety.

To grant easy access to everyone, the door opens inwards with a long-lever handle that requires minimum effort. Ensuring total safety: to prevent the door from being opened accidentally, the handle comes with a mechanical latch that can be opened from both the inside and the outside. Guaranteed against water leaks, thanks to the seal around the entire access perimeter.

Easy to use.

Practical from any point of view: as their ergonomic design makes them easy to use for the person inside and an assistant outside, where present.

COMBI UNITS

Anthracite oak panelling

Customised panelling

Panelling: create your own customised style.

Being able to choose the panel covering means the model will always blend in seamlessly with any bathroom décor. As an alternative to the acrylic panels, you can choose from natural wood panels in three different standard finishes.

Pictured: 384 combi unit - Recessed installation.

Pictured: 384 combi unit - Recessed installation. Version with plinth kit.

The right solution for every installation.

The entire range of combi units can easily be fitted with a plinth kit for installation above the floor, thereby avoiding having to inset the drain system.

products / combi units

382-384-385

Shower or bathtub? Better have both, thanks to the surprising combi units in smaller sizes, adaptable to any setting. Fitted with a sturdy handle with a mechanical latch to prevent the door from being opened accidentally, the door leads to a comfortable shower area. The removable seat transforms this convenient bathtub, available with whirlpool, depending on your requirements: a genuine oasis of relaxation. The styling is truly appealing, with the utmost attention to detail and the choice between several different wood finish panels or fully covered to your liking. Now also available in the new centre-of-the-wall version.

PANEL CUSTOMISATION IN COVERABLE WOOD FINISH

The InsideOut collection immediately fits in with the taste of those who choose it. This lacquered wood furniture system perfectly matches the top and frame in Duralight[®]. The colours, which can be customised with a reference RAL/PANTONE and the different sizes available are the ideal features of a solution that accommodates all your furnishing requirements.

INSIDEOUT

The Duralight® surfaces of the InsideOut cabinets merge sturdiness with lightness in just 6 mm of thickness. The tall units in the collection feature an elegant Duralight® frame, while all the doors are made of lacquered wood. Teuco offers 32 trendy colours, but the customisation possibilities are endless: simply specify a reference RAL/PANTONE at the time of order for a bespoke InsideOut unit in your chosen colour. InsideOut enhances both functionality and styling: all the furniture units are fitted with a soft closing mechanism and a built-in high quality shock absorber. The tall unit shelves are made of 10 mm thick clear glass.

The mirrors are available in two versions: plain or with a surrounding frame in Duralight[®] featuring LED lighting. Available in several sizes to accommodate all your furnishing requirements.

products / furniture

SUIT

It is available in several colours, and it stands out for its beguiling appeal and elegance in the wood finishes (Hickory walnut and the 3 shades of oak). The 45° cut edges enhance the appeal of its design, making the Suit cabinet a unique piece of furniture. Practical and sturdy, it comprises drawers fitted with a soft-closing mechanism and built-in high-quality shock absorber. The cabinet was designed to house the Suit wash basin, but it is also the perfect partner for all the other Duralight® and ceramic wash basins in Teuco's collection.
