BLACK DIAMOND + WOOD	115
----------------------	-----

BLACK DIAMOND

Esclusiva finitura nera di CEA per l'acciaio inox effettuata tramite trattamento di deposizione per evaporazione. Enfatizza le naturali qualità del materiale risaltandone la finitura satinata o lucidata. Un film biocompatibile a base di grafite e polvere di diamante, aumenta la lucentezza e il grado di durezza della superficie.

Ne conseguono maggiore resistenza a soluzioni acide, basiche e solventi, incolumità verso scalfitture e graffi, autolubrificabilità rispetto ai depositi calcarei dell'acqua.

/

Exclusive CEA black finish for stainless steel resulting from a deposition process through evaporation. It emphasizes the natural qualities of the material, highlighting the satin or polished finish. A biocompatible film based on graphite and diamond powder, increases the gloss and the hardness of the surface. The result is an extraordinary resistance to acid, basic solutions and solvents, safety from nicks and scratches, self-lubrication against water lime scales.

BRONZE / COPPER / LIGHT GOLD / BLACK IVORY

Finitura applicata all'acciaio inox che enfatizza le naturali qualità del materiale risaltandone la finitura satinata o lucidata. Effettuata tramite trattamento di deposizione per evaporazione, garantisce durezza, lucentezza attraverso un film biocompatibile che riveste la superficie.

/

Stainless steel finish that emphasize the natural qualities of the material, highlighting the satin or polished treatments.

Resulting from a deposition process through evaporation, it guarantees the hardness and the gloss through a biocompatible film that coats the steel surface.

WENGE / CANALETTO WALNUT / BURMA TEAK / OAK

Quattro esclusive essenze legno che CEA abbina ai comandi delle collezioni GIOTTO, ZIQQ e BAR. Il binomio Acciaio / Legno prosegue il percorso dell'azienda e ribadisce l'ecologia quale fil rouge di tutta la sua produzione. La scelta ecosostenibile si riflette sia nel processo di selezione, in quanto il legno massello stagionato proviene da foreste certificate, che nella lavorazione del prodotto. Come l'acciaio inossidabile, anche il legno si contraddistingue per durezza, ottimo grado di stabilizzazione rispetto ad umidità e temperatura, impermeabilità e resistenza a soluzioni acide e saline. Queste caratteristiche rendono il prodotto adatto anche agli ambienti outdoor.

/

Four exclusive wood essences CEA teams up with the controls of GIOTTO, ZIQQ and BAR collections. The Steel / Wood combination continues to characterize the design experience of the company and further confirms environmental awareness as being the connective thread of the entire production. The eco-sustainable approach is reflected both in the selection of raw materials, as the mature solid wood comes from certified forests, and manufacturing processes. Similarly to stainless steel, the wood also stands out for its hardness, together with an excellent degree of stability in the presence of humidity or extreme temperatures and resistance to acidic and saline solutions. These characteristics also make our products ideal for the outdoor environment.
