# Quality Matters

**At Towelrads we are passionate about creating both beautiful and practical towel rails and designer radiators, that enhance any room within your home.**

All our radiators are manufactured and tested to the European Standard EN 442.

This means that all heat outputs have been independently verified, ensuring that the radiator of your choice performs as expected.

There are many different diameters of tubes used across the industry but at Towelrads we use 25mm tubes on our standard towel rails to ensure maximum heat output.

## Guarantee

Our guarantee is valid providing proper installation of our product has taken place and it has been fitted by a qualified installer. Any damage to a radiator that is caused by the following factors invalidates the guarantee:

- ✘ Poor storage prior to installation
- ✘ Incorrect installation/not following installation instructions correctly
- ✘ Radiators placed in incorrect environments i.e. shower cubicles, public toilets, swimming pools

### A bit of information about your towel radiator:

- All of our wet system radiators are tested according to the EN442 European regulatory standards; and our electric radiators are tested according to EN60335-2.
- Maximum operating temperature is generally at 110 °C, however, certain models may have a slightly reduced temperature range.
- Chrome towel rails and Designer radiators are degreased, coated in a powder coating. Chrome towel rails are then polished and bathed in successive layers of chrome to achieve the high quality look and finish of each radiator.

### Caring for your Chrome Towelrads product:

- Do not clean with abrasive chemicals as this may lead to corrosion and invalidate the warranty.
- Clean with warm water and a little neutral washing up solution, rinsing immediately with clean water and drying with a soft, clean cloth.
- The occasional use of a mild, non-abrasive lime scale remover can be used but **MUST** be rinsed away immediately with cold water (a diluted white vinegar solution is recommended).

# Our Radiators Explained

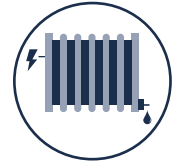

## Central Heating Radiators and Towel Rails

Radiators run off the central boiler system using TRV valves to help you control the temperature.

## Dual Fuel Towel Rails

This option allows the towel rail to be used within the summer months via an electric element when the central heating system is switched off. Benefits include year round warm towels within your bathroom or kitchen.

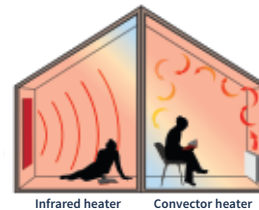

## Electric Radiators and Towel Rails

These are supplied solution filled and with a single heating element fitted. The heating is controlled via the electric mains rather than through a central heating system. The benefits include the ability to control the heat within a chosen room rather than the whole house.

## Infrared Radiators

Our glass radiators use infrared technology to produce comfortable, energy-efficient heat. Traditional convector heaters warm the air, but infrared heat is absorbed by surfaces, objects and people within a room so the heat is retained, keeping the room cosy and dry for longer.

## Ecodesign Compliance

Since January 2018, all local space heaters manufactured for sale in the EU must comply with a minimum efficiency standard under Lot 20 of the Energy Efficiency Directive. It is part of the EU's commitment to achieving a 20 per cent energy saving by 2020, driving energy efficiency at all stages of the supply chain, from production to final consumption.

A number of 'product lots' have already been rolled out as part of the 2012 Energy Efficiency Directive (EED), covering everything from televisions to lightbulbs and washing machines. Next is Lot 20, focusing on local space heaters – and when you consider that more than half of energy consumed in our homes is used to heat water and space, it is easy to see the difference it could make.

# How to order your Towelrads Radiator

## Step 1

Work out the heat output required for your room using the Heat Output Calculator on our website [www.towelrads.com](http://www.towelrads.com) or consulting with your installer.

## Step 2

Our radiator models have been carefully chosen to fit most standard radiator sizes, therefore negating the need for new pipework. Choose the style of towel rail or radiator that suits your requirements. If it is difficult to access the existing central heating pipework, we have a great selection of electric radiators too!

## Step 3

Take a look at the finish and colour options available in your chosen model. Some of our radiators and towel rails are available in a range of top-selling RAL colours; many others are stocked and available for free next-day delivery.

Look out for the Special Finish symbol. 

## Step 4

After you have selected your radiator, choose some of our stylish valves to finish the look. We have many styles and colours to complement your new radiator and pipework orientation. If you want warm, fluffy towels in the summer when the central heating is switched off, take a look at our Dual Fuel options.

## Step 5

Order your radiator by calling **01628 625367** or emailing [orders@towelrads.com](mailto:orders@towelrads.com)

The majority of our radiators are available with free next-day delivery.

# Colour Range

We believe in offering our customers a wide choice of styles and colours to complement their home décor. Many of our stocked radiators are available in contemporary colours with matching valves, ready for next day delivery.

Further colour options are available with 6 weeks' lead time of our 12 top-selling colours.

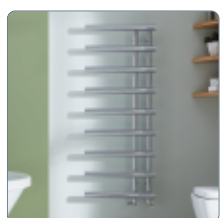

## Our 12 Top-Selling RAL Colours

This beautiful range of colours are available with the following radiators:

Oxfordshire p40

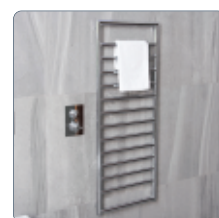

Mayfair p41

Soho p46

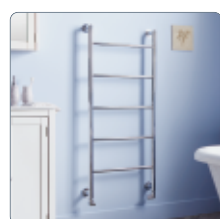

Kensington p47

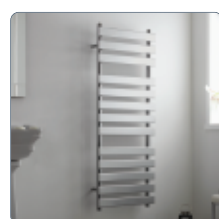

Strand p48

Horton p49

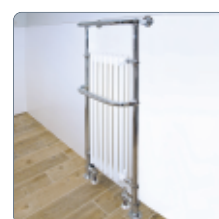

Ballymore p50

Perlo p51

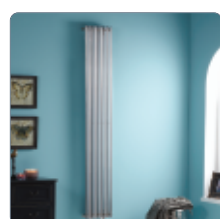

Boxford p53

Hampshire p60

Oxfordshire p65

Iridio p66

Dorney p67

Merlo p68

Mayfair p69

Oxfordshire  
Horizontal p75

Dorney Single  
Horizontal p76

Dorney Double  
Horizontal p77

Please allow 6 weeks for your delivery.

These finishes have a 25% price premium on stocked Anthracite or Black painted products, as appropriate.

# The Ladder Rail Collection

# The Pisa Range

The Pisa range has 25mm diameter tubes which give a greater heat output than most standard 19mm and 22mm tubed towel rails on the market.

Available in both straight and curved designs, the Pisa radiators will complement any bathroom.

## Features and Benefits of the Pisa Range

- High heat output achieved by using 25mm bars
- Versatile, can be used on central heating or dual fuel systems
- Wide range of sizes to cater for all spaces
- An even higher heat output can be achieved via painted or powder coated models
- Horizontal models fit neatly under windows

Bar shape from above

A modern interior scene featuring a glass radiator on a grey wall, two white ceramic vases on a wooden floor, and a grey blanket on a bed. The radiator is a rectangular, light blue-tinted glass panel mounted on the wall. The vases are white with a dark, geometric pattern. The blanket is a textured, grey fabric. The background is a dark grey wall and a white ceiling.

# The Glass Radiator Collection

144238 Vetro Glass Frame

# Glass Radiators

## Towelrads are proud to introduce Vetro, their new range of glass radiators.

Combining elegant frameless design with innovative technology, the Vetro radiator is a must have for any room in your home.

Our glass radiators produce energy-efficient heat through the use of Infrared technology, reaching set temperatures within 5 minutes.

Compared to convector heaters which warm the air, infrared heat is absorbed by surfaces, objects and people allowing the heat to be retained within the room as well as keeping dust and bacteria to a minimum.

Each radiator is made from shatterproof 10mm laminated toughened safety glass (UN12600-IBI) which provides complete peace of mind.

Each radiator comes complete with a fitting guide and hidden adjustable safety wall brackets\* for discreet, fast and simple installation.

## Vetro Horizontal

Ideal as a direct replacement of an existing panel radiator, the Vetro Horizontal range has been produced in accurate replacement sizes to ensure a fast and simple installation.

Each radiator delivers an equivalent heat output to a single panel compact radiator.

*Please pay close attention to the installation instructions. The bottom two brackets to be left loose to allow for product expansion.*

\*manufactured to German Norm VEDE6035.

### Electric Range

- Touch screen control includes illuminated pre-programmed settings for ease of use.
- Wireless remote control is included for easy 7 day timer programming.
- An antifreeze setting that protects the room from falling below 5 – 7 °C, plus a useful drying function which switches the unit on at a pre-set time of 2 hours.
- Suitable for use within zone 2 makes them perfect for use within bathrooms and wet rooms.
- Infrared heat, which is absorbed by surfaces.

### Wet System

- Our patented glass radiators are 100% environmentally friendly and made entirely from recycled materials.
- Efficient and economical to run through the use of an Aluminium heat exchanger resulting in the ability to adapt quickly to changes in temperature and the reduction of time for heating and cooling.
- Corrosion resistant and tested to twice the average bar pressure used in a standard home.
- High heat output up to 90 °C.
- Incorporates standard plumbing fittings for an easy installation into an existing or new central heating system.

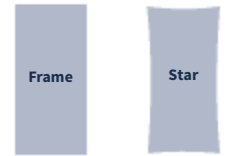

# Vetro Glass

- Low water content
- Toughened glass
- Fixes close to wall
- Aluminium heat exchanger
- 3 types / styles

# The Flat Panel Collection

128107 Horizontal, Type 11, 500 x 1000mm

# Flat Panel

## Features and Benefits

- Withstands external corrosion for twice as long as standard finishes
- Alternative sizes available in Type 21 (P+) and Type 22

## Horizontal, Type 11

Model	Colour	Code	Height (mm)	Length (mm)	Pipe Centres (mm)	Output (Watts)	Output (BTUs)	List Price
Type 11	White	128096	400	600	Width of radiator plus valves	380	1297	£101.74
Type 11	White	128097	400	800	Width of radiator plus valves	506	1726	£116.02

# Towelrads Compact

NEW

## Features and Benefits

- Available with single or double convector for enhanced heat output
- Mounted top and side covers
- Wide range of heights and widths
- Easy installation

## Single Convector

# The Complementary Collection

# Understanding The Complementary Range

## Elements explained

Electric elements are designed to fit inside both plumbed or non plumbed towel rails, this allows the rails to function when the central heating is switched off.

Non Thermostatic elements maintain a constant temperature at which the rail will stay.

Thermostatic elements allow you to control the temperature of the rail to a desired heat.

Timed Thermostatic elements benefit from the addition of a drying function which means that the rail can be turned on for a specific time period as required.

See page 109 for our full range of Towelrads elements.

## Get to know your valves

The type of radiator valve you will need is dependent on the position of the radiator valve inlets that your new radiator requires and the position of the central heating supply flow and return pipes that your radiator feeds off. See the information below:

■ **Manual Radiator Valves** work like a tap, you can turn the top of the valve to allow more or less water into your radiator.

■ **Straight Radiator Valves** join the radiator to the central heating pipework in a straight, horizontal line. The pipe work comes from the floor.

■ **Angled and Corner Radiator Valves** allow you to join the central heating pipework to the radiator at an angle. The radiator valve has a 90° bend in it so that the valve inlet can be met in either a horizontal or vertical position. The pipe work comes from the wall.

The benefit of using Corner valves when pipe work is coming from the wall is that the radiator head will be pointing upwards and will not increase the overall depth of your radiator.

■ **Thermostatic Radiator Valves (TRVs)** unlike manual valves, TRVs self-regulate, taking into account the room temperature to ensure that the radiator works at an optimum temperature.

T-Piece set up

# Smart Elements

## Smart Thermostatic

### Functionality

The heater offers five temperature settings from 30 °C to 65 °C. An electronic temperature sensor ensures precise temperature control.

The device displays the temperature to which it is currently set, and indicates the status of the heating cycle.

Comes with 2 hour boost, 12/24 hour recurring timer.

### Intelligent Home Systems

In the event of a power failure the heating device remembers the most recent settings used, which makes it suitable for connection to external timers or intelligent home systems.

### Safety

The heater has an active safety feature which initiates in the event of dry radiator operation. The heating element is equipped with a temperature sensor and thermal fuse (double overheating protection) and offers frost protection (ANTIFREEZE). The heater will display warning indicators in the case of malfunction.

### Design

A heater with a straight cable, without a plug is supplied.

# Smart Elements

## Smart Non-Thermostatic

### Functionality

The heating element maintains a constant temperature of 65 °C. It has a small, simple controller and IPX5 Ingress Protection.

### Intelligent Home Systems

Device is suitable for connection to external timers or intelligent home systems.

### Safety

The heating element is equipped with double overheating protection.

### Design

Controller encased in a small, round casing.
